Independent auditor's report	59

General information and definitions

The information contained in this Disclosure Statement is as required by section 81 of the Reserve Bank of New Zealand Act 1989 and the Bank Disclosure Statements (New Zealand Incorporated Banks) Order 2014 (as amended) ("Order").

In this Disclosure Statement, unless the context otherwise requires:

- "Rabobank" refers to Coöperatieve Rabobank U.A., incorporated in the Netherlands.
- "Bank" or "Banking Group" refers to Rabobank New Zealand Limited.

The financial information is disclosed for the years ended 31 December 2018 and 31 December 2017, and has been audited by the external auditors, except for the Capital Adequacy and Regulatory Liquidity Information on pages 26 - 31 which has been reviewed by the external auditors.

All amounts referred to in this Disclosure Statement are in New Zealand dollars unless otherwise stated.

General matters

Ultimate parent bank

The Bank's ultimate parent bank is Coöperatieve Rabobank U.A. (referred to as Rabobank). Rabobank's New Zealand address for service is Level 23, 157 Lambton Quay, Wellington, New Zealand.

Summary of regulations

There are no regulations, legislations or other restrictions of a legally enforceable nature that may materially inhibit the legal ability of Rabobank to provide material financial support to the Bank.

Interests in 5% or more of voting securities of Bank

The Bank is 100% owned by Rabobank International Holding B.V., which in turn is 100% owned by Rabobank. Therefore, Rabobank has the ability to indirectly appoint 100% of the board of directors of the Bank.

Priority of creditors' claims

In the event that the Bank is liquidated or ceases to trade, the claims of all creditors, except the preferential claims specified in Schedule 7 to the Companies Act 1993, would be unsecured and would rank in priority equally with each other and behind such preferential claims.

Composition of the Board of directors

There were the following changes in the composition of the Bank's board of directors in 2018:

- William Patrick Gurry resigned from the Board with effect on 12 March 2018.
- Jillian Shirley Segal was appointed to the Board with effect on and from 12 March 2018.

General matters (continued)

The documents or communication should be marked for the attention of the Director.

General matters (continued)

Signing of the disclosure statement

Todd Charteris, Chief Executive New Zealand, has signed this Disclosure Statement on behalf of the following directors:

- Sir Henricus (Henry) Wilhelmus van der Heyden (Chairman)
- Geerten Battjes
- Andrew James Borland
- Anne Bernadette Brennan
- Peter James Knoblanche
- Bernardus Jacobus Marttin
- Jan Alexander Pruijs
- Jillian Shirley Segal

Director related transactions

In relation to each director, neither the director nor any immediate relative or close business associate of the director has entered into any transaction with the Bank or any other member of the Banking Group that either:

- has been entered into on terms other than those which would, in the ordinary course of business of the Bank or any other member of the Banking Group, be given to any other person of like circumstances or means; or
- could otherwise be reasonably likely to influence materially the exercise of that director's duties.

Board audit committee

The Bank has a board audit committee (BAC).

The BAC is currently comprised of seven members, four of whom are independent non-executive directors of the Bank (including the chair of the BAC) – the other three are non-independent non-executive directors. The BAC meets at least four times per annum.

On 21 February 2019, the Bank's Board established the current BAC as a board audit committee specifically for the Bank, replacing the regionally based board audit committee - and with its own specific charter.

Conflict of interest policy

The board of directors has a policy for avoiding or dealing with conflicts of interest which may arise from the personal, professional or business interests of the directors.

Under the policy, each director must disclose specific interests in transactions with the Bank and can also disclose, by general notice, that the director is to be regarded as interested in any transaction between the Bank and any specified company/person of which the director is a shareholder, director, officer or trustee. The disclosures are made by way of email to co-directors and the Bank's interests register is maintained to reflect the disclosures. The Bank's Compliance function decides how each disclosed interest may have to be managed.

The policy reflects the specific provisions of the Bank's constitution and the Companies Act 1993.

Auditors for the Bank

Ashley Wood PricewaterhouseCoopers One International Towers, Watermans Quay BARANGAROO NSW 2000 AUSTRALIA

Credit ratings

The Bank has the following general credit rating applicable to its long term senior unsecured obligations, including obligations payable in New Zealand, in New Zealand dollars.

There has been a change to the rating in the two years immediately before 31 December 2018. On 17 September 2017 Standard & Poor's revised its rating of the Bank from 'A (stable)' to 'A (positive)'.

Rating Agency	Current Credit Rating
Standard & Poor's	A (positive)

The amounts disclosed above are obtained from audited annual reports.

Guarantee arrangements

Under a series of guarantees, the Rabobank group parent entity guaranteed all the Bank's obligations. Each such guarantee has now expired, except that all obligations incurred by the Bank while a guarantee was current and before the guarantee expired remain guaranteed until those obligations are repaid. The only obligations that remain guaranteed are therefore obligations that were incurred before the close of 30 April 2015 and that have not subsequently been repaid e.g. a deposit obligation incurred before 30 April 2015 will have been repaid (and the deposit obligation will have ceased to be guaranteed) if the deposit is paid into an account with another bank.

Based on the above, material obligations of the Bank are guaranteed as at the date its directors signed this Disclosure Statement. All new obligations incurred by the Bank after 30 April 2015 are not guaranteed.

Guarantee arrangements (continued)

Details of guarantor

The name and New Zealand address for service of the guarantor are:

Coöperatieve Rabobank U.A. (Rabobank) Level 23 157 Lambton Quay Wellington New Zealand

Coöperatieve Rabobank U.A. is not a member of the Banking Group.

The guarantor – Rabobank

	31 December 2018 €m	31 December 2017 €m
Qualifying Capital*	53,259	51,923
Qualifying Capital*/RWA(%)	26.6	26.2

*Qualifying Capital consists of the sum of core capital (tier one) and supplementary capital (tier two). Tier two capital includes the revaluation reserves, part of the subordinated loans less deductible items specified by the De Nederlandsche Bank.

Rabobank has the following credit ratings applicable to its long term senior unsecured obligations payable in any country or currency, including obligations payable in New Zealand in New Zealand dollars and in the Netherlands (the country of its incorporation).

Current Credit Rating
A+ (positive)
Aa3 (stable)
AA- (stable)

There have been changes to the ratings in the two years immediately before 31 December 2018. On 17 September 2017 Standard & Poor's revised its rating of Rabobank from 'A+ (stable)' to 'A+ (positive)'. On 27 March 2018 Moody's revised Rabobank's rating from Aa2 (negative) to Aa3 (stable).

Guarantee arrangements (continued)

Descriptions of the credit rating scales are as follows:

	Standard & Poor's	Moody's	Fitch
Ability to repay principal and interest is extremely strong. This is the highest investment category.	AAA	Aaa	AAA
Very strong ability to repay principal and interest.	AA	Aa	AA
Strong ability to repay principal and interest although somewhat susceptible to adverse changes in economic, business or financial conditions.	A	A	A
Adequate ability to repay principal and interest. More vulnerable to adverse changes.	BBB	Ваа	BBB
Significant uncertainties exist which could affect the payment of principal and interest on a timely basis.	BB	Ва	BB
Greater vulnerability and therefore greater likelihood of default.	В	В	В
Likelihood of default now considered high. Timely repayment of principal and interest is dependent on favorable financial conditions.	ССС	Саа	CCC
Highest risk of default.	CC	Ca to C	CC
Obligations currently in default.	D	-	D

Obligations currently in default.

Moody's Investors Service apply numeric modifiers 1 (higher end), 2 or 3 (lower end) to ratings from Aa to B to show relative standing within major categories. Credit ratings by Fitch Ratings and Standard & Poor's may be modified by the addition of a plus (higher end) or minus (lower end) sign.

Details of guaranteed obligations

There are no limits on the amount of the obligations guaranteed under any of the expired guarantees and no material conditions applicable to the guarantees other than non-performance by the Bank. However, the fact that the guarantees have expired means that for an obligation to be covered, it must have been incurred before the close of 30 April 2015 and not have been subsequently repaid.

There are no material legislative or regulatory restrictions in the Netherlands which would have the effect of subordinating the claims, under the above guarantees, of any of the creditors of the Bank on the assets of Rabobank, to other claims on Rabobank, in a winding up of Rabobank.

Material cross guarantee

No material obligations of the Bank are guaranteed under a cross guarantee arrangement.

Pending proceedings or arbitration

There are no pending legal proceedings or arbitrations concerning any member of the Banking Group, whether in New Zealand or elsewhere, that may have a material adverse effect on the Bank or the Banking Group.

Insurance business

The Banking Group does not conduct any insurance business.

Risk management policies

The Bank has an integrated risk management framework driven from governance level down to operational levels, covering all aspects of risk most notably credit, market, and operational risks but also compliance, currency, interest rate and liquidity risks. Credit risk includes concentration of credit risk, intra-day credit risk, credit risk to bank counterparties and related party credit risk. The Bank's Risk Management Strategy ("RMS") defines how the Bank manages risk across the Bank within the constraints of its overall risk appetite.

The RMS covers:

- the Bank's approach to risk management across all material risk categories;
- the policies and procedures dealing with risk management matters;
- key roles and responsibilities of the different functions within the Bank to deal with risk;
- the risk management governance and organisational structure implemented in the Bank to manage risk across the material risk categories;
- the approach to supporting persons within the Bank to have an awareness of the risk management framework and for instilling an appropriate risk culture across the Bank; and
- the various tools and systems implemented to effectively manage risks.

The components of the Bank's risk management framework include:

- documented and approved delegations of authority;
- standing risk committees with appropriate terms of reference;
- three lines of assurance model; and
- reporting including appropriate data and management information systems.

The Board, Risk & Compliance Committee ("BRCC") oversees the implementation, review and monitoring of the Risk Management Strategy ("RMS"). This includes maintaining an appropriate risk appetite, risk management framework, internal control systems and management reporting framework.

In respect of the 27 November 2018 meeting of the regional (Australia and New Zealand) BRCC, there was a separate agenda and meeting, and separate minutes, for matters relating to the Bank. On 21 February 2019, the Bank's Board established the current BRCC as a board risk and compliance committee specifically for the Bank, replacing the regional board risk & compliance committee - and with its own specific charter.

The Bank's Management Team and the relevant RANZ Management Committees (with Bank representation) provide oversight across the separate risk categories. This enables an appropriate level of oversight of the effective implementation of the RMS, sub-committees have also been established.

The Bank develops and implements policies for specific business units supported by procedures, templates, and other tools covering product policy, procedure and other key aspects of the operations of the Bank. These are designed to provide staff with the necessary guidance to allow them to fulfil their duties in a knowledgeable way and minimise operational risk.

Operational risk is the risk of loss resulting from inadequate or failed internal processes, human or systems errors and unexpected external events. Operational risk is inherent within the Bank's activities. The Bank has an operational risk framework which is described in the RMS and is in line with the Bank's Risk Appetite Statement. The Bank uses Key Risk Indicators and Key Control Indicators to measure and monitor operational risk. These are described in the Risk Appetite Statement. The Indicators are measured on a quarterly basis to monitor that the operational risk remains at an acceptable level and in accordance with the Risk Appetite Statement.

The Bank does not take any equity risk.

Risk management policies (continued)

Refer to note 31 in the financial statements for:

- policies on liquidity, market and credit risk;
- explanations of the nature of each such risk and the activities of the Bank that give rise to each such risk;
- descriptions of exposure limits and policies with respect to collateral or other security (if applicable).

Risk management review

The approach to risk management, as described in the RMS, is reviewed on an annual basis. Aspects of the risk management policies, procedures and implementation are reviewed as part of the annual review cycle by the Bank's Internal Audit department.

Internal audit function

The Bank has an Internal Audit function which is part of a regionally based Rabobank Australia and New Zealand ("RANZ") Internal Audit department, which is in turn part of a global Internal Audit function of the Rabobank Group. The Bank's New Zealand based staff have a hierarchical and functional reporting line to the Head of Internal Audit RANZ and an administrative line to the Bank's CEO. The Head of Internal Audit RANZ has a hierarchical reporting line to the chair of the Bank's board audit committee ("BAC") and a functional reporting line to Rabobank's global head of audit, Wholesale, Rural & Retail. Internal Audit is responsible for providing an independent review on the adequacy and effectiveness of the Bank's control environment, which is confirmed in the Audit Charter.

The annual internal audit plan is presented to and approved by the BAC. The BAC regularly reviews the progress made by Internal Audit in accordance with the annual internal audit plan, considers the findings arising from the work conducted and assesses if appropriate action is taken by management. In addition to its internal audit responsibilities, the BAC monitors the external audit services being provided by the Bank's external auditors.

Internal Audit performs audits using a risk based approach. Accordingly, greater emphasis is placed on those areas assessed as involving higher levels of risk. The frequency of audits depends on each annual plan.

Securitisation, funds management, other fiduciary activities and the marketing and distribution of insurance products

The Banking Group had no involvement in the origination of securitised assets, the marketing or servicing of securitisation schemes or the marketing and distribution of insurance products.

The Banking Group has no involvement in trust, custodial, funds management, or other fiduciary activities established, marketed or sponsored by a member of the Banking Group.

During the year ended 31 December 2018 the Bank ceased offering managed funds and the Cash Advantage Fund (CAF) and Term Advantage Fund (TAF) through RaboDirect, an online banking and investment service, and no managed funds, CAF or TAF investments are now held through RaboDirect. RaboDirect managed funds customers (excluding the CAF and TAF) were offered the option to shift their fund holdings to another distributor of third party managed funds, InvestNow Saving and Investment Service Limited, and most such customers took that option. Investments in the CAF and TAF were redeemed.

Other material matters

As referenced in the disclosure statement for the six months ended on 30 June 2018, the Bank conducted an independent review of its governance and management frameworks and their operation, the extent of their independence from the global Rabobank co-operative group, and their consistency with the current expectations of the Reserve Bank of New Zealand. The review has now concluded. It found that the Bank's governance arrangements complied with the relevant legislation and its conditions of registration. Rabobank is committed to ensuring that its governance and management frameworks remain appropriate and consistent with regulator expectations and requirements.

There have been no other matters relating to the business or affairs of the Bank and the Banking Group that:

- (i) are not contained elsewhere in this Disclosure Statement; and
- (ii) would, if disclosed, materially affect the decision of a person to subscribe for debt securities of which the Bank or any member of the Banking Group is the issuer.

Auditor's report

The Disclosure Statement has been audited by external auditor PricewaterhouseCoopers, except for the Capital Adequacy and Regulatory Liquidity Information on pages 26-31 which has been reviewed. The statement of the nature and scope of the audit is included in the attached auditor's report.

Conditions of registration

There have been changes to the Bank's Conditions of Registration since 30 June 2018.

With effect on and after 1 October 2018, a change was made to the Conditions of Registration reflecting some minor and technical changes to the Reserve Bank of New Zealand's Liquidity Policy Annex (BS 13A).

With effect on and after 1 January 2019, a change was made to the Conditions of Registration. The changes are related to the Reserve Bank's loan-to-valuation ratio (LVR) requirements, "Framework for Restrictions on High-LVR Residential Mortgage Lending" (BS19) changes and to the capital conditions of registration.

Conditions of registration for Rabobank New Zealand Limited

Below is a copy of the Conditions of Registration that applied at 31 December 2018.

These conditions apply on and after 1 October 2018.

The registration of Rabobank New Zealand Limited ("the Bank") as a registered bank is subject to the following conditions:

- 1. That-
 - (a) the Total capital ratio of the Banking Group is not less than 8%;
 - (b) the Tier 1 capital ratio of the Banking Group is not less than 6%;
 - (c) the Common Equity Tier 1 capital ratio of the Banking Group is not less than 4.5%;
 - (d) the Total capital of the Banking Group is not less than \$30 million;
 - (e) the Bank must not include the amount of an Additional Tier 1 capital instrument or Tier 2 capital instrument issued after 1 January 2013 in the calculation of its capital ratios unless it has received a notice of non-objection to the instrument from the Reserve Bank; and
 - (f) the Bank meets the requirements of Part 3 of the Reserve Bank of New Zealand document "Application requirements for capital recognition or repayment and notification requirements in respect of capital" (BS16) dated November 2015 in respect of regulatory capital instruments.

Conditions of registration (continued)

Conditions of registration for Rabobank New Zealand Limited (continued)

For the purposes of this condition of registration,-

- the Total capital ratio, the Tier 1 capital ratio, the Common Equity Tier 1 capital ratio and Total capital must be calculated in accordance with the Reserve Bank of New Zealand document: "Capital Adequacy Framework (Standardised Approach)" (BS2A) dated November 2015;
- an Additional Tier 1 capital instrument is an instrument that meets the requirements of subsection 8(2)(a) or (c) of the Reserve Bank of New Zealand document "Capital Adequacy Framework (Standardised Approach)" (BS2A) dated November 2015.
- a Tier 2 capital instrument is an instrument that meets the requirements of subsection 9(2)(a) or (c) of the Reserve Bank of New Zealand document "Capital Adequacy Framework (Standardised Approach)" (BS2A) dated November 2015.

1A. That-

- (a) the bank has an internal capital adequacy assessment process ("ICAAP") that accords with the requirements set out in the document "Guidelines on a bank's internal capital adequacy assessment process ('ICAAP')" (BS12) dated December 2007;
- (b) under its ICAAP the bank identifies and measures its "other material risks" defined as all material risks of the Banking Group that are not explicitly captured in the calculation of the Common Equity Tier 1 capital ratio, the Tier 1 capital ratio and the Total capital ratio under the requirements set out in the document "Capital Adequacy Framework (Standardised Approach)" (BS2A) dated November 2015; and
- (c) the Bank determines an internal capital allocation for each identified and measured "other material risk".
- 1B. That, if the buffer ratio of the Banking Group is 2.5% or less, the Bank must:
 - (a) according to the following table, limit the aggregate distributions of the Bank's earnings to the percentage limit to distributions that corresponds to the Banking Group's buffer ratio:

Banking Group's buffer ratio	Percentage limit to distributions of the Bank's earnings
0%-0.625%	0%
>0.625-1.25%	20%
>1.25-1.875%	40%
>1.875-2.5%	60%

- (b) prepare a capital plan to restore the Banking Group's buffer ratio to above 2.5% within any timeframe determined by the Reserve Bank for restoring the buffer ratio; and
- (c) have the capital plan approved by the Reserve Bank.

For the purposes of this condition of registration,-

"buffer ratio", "distributions", and "earnings" have the same meaning as in Part 3 of the Reserve Bank of New Zealand document: "Capital Adequacy Framework (Standardised Approach)" (BS2A) dated November 2015.

2. That the Banking Group does not conduct any non-financial activities that in aggregate are material relative to its total activities.

In this condition of registration, the meaning of "material" is based on generally accepted accounting practice.

3. That the Banking Group's insurance business is not greater than 1% of its total consolidated assets.

For the purposes of this condition of registration, the Banking Group's insurance business is the sum of the following amounts for entities in the Banking Group:

- (a) if the business of an entity predominantly consists of insurance business and the entity is not a subsidiary of another entity in the Banking Group whose business predominantly consists of insurance business, the amount of the insurance business to sum is the total consolidated assets of the group headed by the entity; and
- (b) if the entity conducts insurance business and its business does not predominantly consist of insurance business and the entity is not a subsidiary of another entity in the Banking Group whose business predominantly consists of insurance business, the amount of the insurance business to sum is the total

Conditions of registration (continued)

Conditions of registration for Rabobank New Zealand Limited (continued)

liabilities relating to the entity's insurance business plus the equity retained by the entity to meet the solvency or financial soundness needs of its insurance business.

In determining the total amount of the Banking Group's insurance business-

- (a) all amounts must relate to on balance sheet items only, and must comply with generally accepted accounting practice; and
- (b) if products or assets of which an insurance business is comprised also contain a non-insurance component, the whole of such products or assets must be considered part of the insurance business.

For the purposes of this condition of registration,-

"insurance business" means the undertaking or assumption of liability as an insurer under a contract of insurance:

"insurer" and "contract of insurance" have the same meaning as provided in sections 6 and 7 of the Insurance (Prudential Supervision) Act 2010.

4. That the aggregate credit exposures (of a non-capital nature and net of any allowances for impairment) of the Banking Group to all connected persons do not exceed the rating-contingent limit outlined in the following matrix:

Credit rating of the Bank ¹	Connected exposure limit (% of the Banking Group's Tier 1 capital)
AA/Aa2 and above	75
AA-/Aa3	70
A+/A1	60
A/A2	40
A-/A3	30
BBB+/Baa1 and below	15

Within the rating-contingent limit, credit exposures (of a non-capital nature and net of any allowances for impairment) to non-bank connected persons shall not exceed 15% of the Banking Group's Tier 1 capital.

For the purposes of this condition of registration, compliance with the rating-contingent connected exposure limit is determined in accordance with the Reserve Bank of New Zealand document entitled "Connected Exposures Policy" (BS8) dated November 2015.

- 5. That exposures to connected persons are not on more favourable terms (e.g. as relates to such matters as credit assessment, tenor, interest rates, amortisation schedules and requirement for collateral) than corresponding exposures to non-connected persons.
- 6. That the Bank complies with the following corporate governance requirements:
 - (a) the board of the Bank must have at least five directors;
 - (b) the majority of the board members must be non-executive directors;
 - (c) at least half of the board members must be independent directors;
 - (d) an alternate director,-
 - (i) for a non-executive director must be non-executive; and
 - (ii) for an independent director must be independent;
 - (e) at least half of the independent directors of the Bank must be ordinarily resident in New Zealand;
 - (f) the chairperson of the board of the Bank must be independent; and

¹ This table uses the rating scales of Standard & Poor's, Fitch Ratings and Moody's Investors Service. (Fitch Ratings' scale is identical to Standard & Poor's.)

Conditions of registration (continued)

Conditions of registration for Rabobank New Zealand Limited (continued)

(g) the Bank's constitution must not include any provision permitting a director, when exercising powers or performing duties as a director, to act other than in what he or she believes is the best interests of the company (i.e. the Bank).

For the purposes of this condition of registration, "non-executive" and "independent" have the same meaning as in the Reserve Bank of New Zealand document entitled "Corporate Governance" (BS14) dated July 2014.

- 7. That no appointment of any director, chief executive officer, or executive who reports or is accountable directly to the chief executive officer, is made in respect of the Bank unless:
 - (a) the Reserve Bank has been supplied with a copy of the curriculum vitae of the proposed appointee; and
 - (b) the Reserve Bank has advised that it has no objection to that appointment.
- 8. That a person must not be appointed as chairperson of the board of the Bank unless:
 - (a) the Reserve Bank has been supplied with a copy of the curriculum vitae of the proposed appointee; and
 - (b) the Reserve Bank has advised that it has no objection to that appointment.
- 9. That the Bank has a board audit committee, or other separate board committee covering audit matters, that meets the following requirements:
 - (a) the mandate of the committee must include: ensuring the integrity of the Bank's financial controls, reporting systems and internal audit standards;
 - (b) the committee must have at least three members;
 - (c) every member of the committee must be a non-executive director of the Bank;
 - (d) the majority of the members of the committee must be independent; and
 - (e) the chairperson of the committee must be independent and must not be the chairperson of the Bank.

For the purposes of this condition of registration, "non-executive" and "independent" have the same meaning as in the Reserve Bank of New Zealand document entitled "Corporate Governance" (BS14) dated July 2014.

- 10. That a substantial proportion of the Bank's business is conducted in and from New Zealand.
- 11. That no more than 10% of total assets may be beneficially owned by a SPV.

For the purposes of this condition,-

"total assets" means all assets of the Banking Group plus any assets held by any SPV that are not included in the Banking Group's assets:

"SPV" means a person-

- (a) to whom any member of the Banking Group has sold, assigned, or otherwise transferred any asset;
- (b) who has granted, or may grant, a security interest in its assets for the benefit of any holder of any covered bond; and
- (c) who carries on no other business except for that necessary or incidental to guarantee the obligations of any member of the Banking Group under a covered bond:

"covered bond" means a debt security issued by any member of the Banking Group, for which repayment to holders is guaranteed by a SPV, and investors retain an unsecured claim on the issuer.

12. That-

- (a) no member of the Banking Group may give effect to a qualifying acquisition or business combination that meets the notification threshold, and does not meet the non-objection threshold, unless:
 - (i) the Bank has notified the Reserve Bank in writing of the intended acquisition or business combination and at least 10 working days have passed; and
 - (ii) at the time of notifying the Reserve Bank of the intended acquisition or business combination, the Bank provided the Reserve Bank with the information required under the Reserve Bank of New Zealand Banking Supervision Handbook document "Significant Acquisitions Policy" (BS15) dated December 2011; and

Conditions of registration (continued)

Conditions of registration for Rabobank New Zealand Limited (continued)

- (b) no member of the Banking Group may give effect to a qualifying acquisition or business combination that meets the non-objection threshold unless:
 - (i) the Bank has notified the Reserve Bank in writing of the intended acquisition or business combination;
 - (ii) at the time of notifying the Reserve Bank of the intended acquisition or business combination, the Bank provided the Reserve Bank with the information required under the Reserve Bank of New Zealand Banking Supervision Handbook document "Significant Acquisitions Policy" (BS15) dated December 2011; and
 - (iii) the Reserve Bank has given the Bank a notice of non-objection to the significant acquisition or business combination.

For the purposes of this condition of registration, "qualifying acquisition or business combination", "notification threshold" and "non-objection threshold" have the same meaning as in the Reserve Bank of New Zealand Banking Supervision Handbook document "Significant Acquisitions Policy" (BS15) dated December 2011.

- 13. That the Banking Group complies with the following quantitative requirements for liquidity-risk management:
 - (a) the one-week mismatch ratio of the Banking Group is not less than zero per cent at the end of each business day;
 - (b) the one-month mismatch ratio of the Banking Group is not less than zero per cent at the end of each business day; and
 - (c) the one-year core funding ratio of the Banking Group is not less than 75 per cent at the end of each business day.

For the purposes of this condition of registration, the ratios identified must be calculated in accordance with the Reserve Bank of New Zealand documents entitled "Liquidity Policy" (BS13) dated January 2018 and "Liquidity Policy Annex: Liquid Assets" (BS13A) dated October 2018.

- 14. That the Bank has an internal framework for liquidity risk management that is adequate in the Bank's view for managing the Bank's liquidity risk at a prudent level, and that, in particular:
 - (a) is clearly documented and communicated to all those in the organisation with responsibility for managing liquidity and liquidity risk;
 - (b) identifies responsibility for approval, oversight and implementation of the framework and policies for liquidity risk management;
 - (c) identifies the principal methods that the Bank will use for measuring, monitoring and controlling liquidity risk; and
 - (d) considers the material sources of stress that the Bank might face, and prepares the Bank to manage stress through a contingency funding plan.
- 15. That the Bank is pre-positioned for Open Bank Resolution and in accordance with a direction from the Reserve Bank, the Bank can-
 - (a) close promptly at any time of the day and on any day of the week and that effective upon the appointment of the statutory manager-
 - (i) all liabilities are frozen in full; and
 - (ii) no further access by customers and counterparties to their accounts (deposits, liabilities or other obligations) is possible;
 - (b) apply a de minimis to relevant customer liability accounts;
 - (c) apply a partial freeze to the customer liability account balances;
 - (d) reopen by no later than 9am the next business day following the appointment of a statutory manager and provide customers access to their unfrozen funds;
 - (e) maintain a full freeze on liabilities not pre-positioned for open bank resolution; and
 - (f) reinstate customers' access to some or all of their residual frozen funds.

For the purposes of this condition of registration, "de minimis", "partial freeze", "customer liability account", and "frozen and unfrozen funds" have the same meaning as in the Reserve Bank of New Zealand document "Open Bank Resolution (OBR) Pre-positioning Requirements Policy" (BS 17) dated September 2013.

Conditions of registration (continued)

Conditions of registration for Rabobank New Zealand Limited (continued)

- 16. That the Bank has an Implementation Plan that-
 - (a) is up-to-date; and
 - (b) demonstrates that the Bank's prepositioning for Open Bank Resolution meets the requirements set out in the Reserve Bank document: "Open Bank Resolution Pre-positioning Requirements Policy" (BS 17) dated September 2013.

For the purposes of this condition of registration, "Implementation Plan" has the same meaning as in the Reserve Bank of New Zealand document "Open Bank Resolution (OBR) Pre-positioning Requirements Policy" (BS17) dated September 2013.

- 17. That the Bank has a compendium of liabilities that-
 - (a) at the product-class level lists all liabilities, indicating which are-
 - (i) pre-positioned for Open Bank Resolution; and
 - (ii) not pre-positioned for Open Bank Resolution;
 - (b) is agreed to by the Reserve Bank; and
 - (c) if the Reserve Bank's agreement is conditional, meets the Reserve Bank's conditions.

For the purposes of this condition of registration, "compendium of liabilities", and "pre-positioned and not prepositioned liabilities" have the same meaning as in the Reserve Bank of New Zealand document "Open Bank Resolution (OBR) Pre- positioning Requirements Policy" (BS 17) dated September 2013.

18. That on an annual basis the Bank tests all the component parts of its Open Bank Resolution solution that demonstrates the Bank's prepositioning for Open Bank Resolution as specified in the Bank's Implementation Plan.

For the purposes of this condition of registration, "Implementation Plan" has the same meaning as in the Reserve Bank of New Zealand document "Open Bank Resolution (OBR) Pre-positioning Requirements Policy" (BS17) dated September 2013.

- 19. That, for a loan-to-valuation measurement period, the total of the bank's qualifying new mortgage lending amount in respect of property-investment residential mortgage loans with a loan-to-valuation ratio of more than 65%, must not exceed 5% of the total of the qualifying new mortgage lending amount in respect of property-investment residential mortgage loans arising in the loan-to-valuation measurement period.
- 20. That, for a loan-to-valuation measurement period, the total of the bank's qualifying new mortgage lending amount in respect of non property-investment residential mortgage loans with a loan-to-valuation ratio of more than 80%, must not exceed 15% of the total of the qualifying new mortgage lending amount in respect of non property-investment residential mortgage loans arising in the loan-to-valuation measurement period.
- 21. That the bank must not make a residential mortgage loan unless the terms and conditions of the loan contract or the terms and conditions for an associated mortgage require that a borrower obtain the registered bank's agreement before the borrower can grant to another person a charge over the residential property used as security for the loan.

In these conditions of registration,-

"Banking Group" means Rabobank New Zealand Limited (as reporting entity) and all other entities included in the group as defined in section 6(1) of the Financial Markets Conduct Act 2013 for the purposes of Part 7 of that Act.

"generally accepted accounting practice" has the same meaning as in section 8 of the Financial Reporting Act 2013.

Conditions of registration (continued)

Conditions of registration for Rabobank New Zealand Limited (continued)

In conditions of registration 19 to 21,-

"loan-to-valuation ratio", "non property-investment residential mortgage loan", "property-investment residential mortgage loan", "qualifying new mortgage lending amount in respect of property-investment residential mortgage loans", "qualifying new mortgage lending amount in respect of non property-investment residential mortgage loans", and "residential mortgage loan" have the same meaning as in the Reserve Bank of New Zealand document entitled "Framework for Restrictions on High-LVR Residential Mortgage Lending" (BS19) dated January 2018.

"loan-to-valuation measurement period" means a period of six calendar months ending on the last day of the sixth calendar month, the first of which ends on the last day of June 2018.

Directors' Statement

After due enquiry, each director believes that:

- (i) as at the date on which the Disclosure Statement is signed:
 - The Disclosure Statement contains all the information that is required by the Order; and
 - The Disclosure Statement is not false or misleading; and
- (ii) over the full year accounting period:
 - The Bank has complied with all Conditions of Registration that applied during that period;
 - Credit exposures to connected persons (if any) were not contrary to the interests of the Banking Group; and
 - The Bank had systems in place to monitor and control adequately the Banking Group's material risks, including credit risk, concentration of credit risk, interest rate risk, currency risk, equity risk, liquidity risk, operational risk and other business risks, and that those systems were being properly applied (the Bank does not have any equity risk, and therefore neither has nor requires any system to monitor or control equity risk).

Signed by Todd Charteris, Chief Executive Officer, under an authority from each of the directors.

Todd Charteris Dated: 26 March 2019

Independent auditor's report

To the shareholder of Rabobank New Zealand Limited

This report is for Rabobank New Zealand Limited (the "Bank") at 31 December 2018 and for the year then ended.

This report includes:

- our audit opinion on the financial statements prepared in accordance with Clause 24 of the Registered Bank Disclosure Statements (New Zealand Incorporated Registered Banks) Order 2014 (as amended) (the 'Order'), New Zealand Equivalents to International Financial Reporting Standards ('NZ IFRS') and International Financial Reporting Standards ('IFRS').
- our audit opinion on the supplementary information prepared in accordance with Schedules 4, 7, 13, 14, 15 and 17 of the Order.
- our audit opinion on other legal and regulatory requirements in accordance with Clauses 2(1)(d) and 2(1)(e) of Schedule 1 of the Order.
- our review conclusion on the supplementary information relating to capital adequacy and regulatory liquidity requirements prepared in accordance with Schedule 9 of the Order.

Report on the audit of the financial statements and supplementary information (excluding the supplementary information relating to capital adequacy and regulatory liquidity requirements)

We have audited the Bank's financial statements required by Clause 24 of the Order and supplementary information (excluding the supplementary information relating to capital adequacy and regulatory liquidity requirements disclosed on page 26 to 31 inclusive and in Note 40 of the financial statements) required by Schedules 4, 7, 13, 14, 15 and 17 of the Order which comprises:

- the statement of financial position as at 31 December 2018;
- the statement of comprehensive income for the year then ended;
- the statement of changes in equity for the year then ended;
- the statement of cash flows for the year then ended;
- the notes to the financial statements, which include significant accounting policies; and
- the supplementary information required by Schedules 4, 7, 13, 14, 15 and 17 of the Order.

PricewaterhouseCoopers, ABN 52 780 433 757 One International Towers Sydney, Watermans Quay, Barangaroo, GPO BOX 2650, SYDNEY NSW 2001 T: +61 2 8266 0000, F: +61 2 8266 9999, www.pwc.com.au Level 11, 1PSQ, 169 Macquarie Street, Parramatta NSW 2150, PO Box 1155 Parramatta NSW 2124 T: +61 2 9659 2476, F: +61 2 8266 9999, www.pwc.com.au Liability limited by a scheme approved under Professional Standards Legislation.

Our opinion

In our opinion:

- The Bank's financial statements (excluding the supplementary information disclosed in accordance with Schedules 4, 7, 9, 13, 14, 15 and 17 of the Order and included within the Statement of Financial position, pages 26 to 31 inclusive and in Note 40):
 - (i) comply with generally accepted accounting practice in New Zealand;
 - (ii) comply with International Financial Reporting Standards; and
 - (iii) give a true and fair view of the financial position of the Bank as at 31 December 2018, and its financial performance and cash flows for the year then ended.
- The supplementary information disclosed in accordance with Schedules 4, 7, 13, 14, 15 and 17 of the Order and included within the Statement of Financial Position, pages 26 to 31 inclusive and in Note 40:
 - (i) has been prepared, in all material respects, in accordance with the guidelines issued under section 78(3) of the Reserve Bank of New Zealand Act 1989 or any conditions of registration;
 - (ii) is in accordance with the books and records of the Bank; and
 - (iii) fairly states, in all material respects, the matters to which it relates in accordance with those Schedules.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (New Zealand) (ISAs NZ) and International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated financial statements and supplementary information (excluding the supplementary information relating to capital adequacy and regulatory liquidity requirements) section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our audit approach

Overview

An audit is designed to obtain reasonable assurance whether the financial statements are free from material misstatement.

Overall materiality is \$7.1 million, which represents approximately 5% of profit before income tax. We chose profit before income tax as the benchmark because, in our view, it is the benchmark against which the performance of the Bank is most commonly measured by users, and is a generally accepted benchmark.

The 5% is based on our professional judgement, noting that it is also within the range of commonly accepted profit-related thresholds.

We have determined that there is one key audit matter and we have communicated this to the Board Audit Committee:

• Provisions for impairment on loans and advances in accordance with the new accounting standard NZ IFRS 9 Financial Instruments.

Materiality

The scope of our audit was influenced by our application of materiality.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall materiality for the financial statements as a whole as set out above. These, together with qualitative considerations, helped us to determine the scope of our audit, the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Audit scope

We designed our audit by assessing the risks of material misstatement in the financial statements and our application of materiality. As in all of our audits, we also addressed the risk of management override of internal controls including among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the financial statements as a whole, taking into account the structure of the Bank, the accounting processes and controls, and the industry in which the Bank operates.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current year. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Further, any commentary on the outcomes of a particular audit procedure is made in that context.

Key audit matter

How our audit addressed the key audit matter

Provisions for impairment on loans and advances in accordance with the new accounting standard NZ IFRS 9 Financial Instruments (Refer to Note 10 and 18 of the financial statements).

Provisions for impairment on loans and advances were a key audit matter because of the subjective and complex judgements made by the Bank in determining the necessity for, and then estimating the size of, provisions for impairment on loans and advances.

In addition, the Bank adopted the new accounting standard NZ IFRS 9 Financial Instruments which introduces an expected credit loss ("ECL") model which takes into account forward looking information reflecting the Bank's view on potential future economic events. This requires considerable judgement to estimate ECL provision against financial instruments.

Key elements in the provisioning for impairment on loans and advances under NZ IFRS 9 include:

- The judgement applied in determining exposures that have a significant increase in credit risk including the allocation of all financial assets subject to impairment into 3 separate stages depending on their nature and characteristics
- The application and judgements in setting the assumptions used in the ECL models, such as estimating forward looking probability of default (PD), loss given default (LGD) of financial instruments and macro-economic scenarios and their weightings

We assessed the design and tested the operating effectiveness of relevant key controls over the provisioning for impairment on loans and advances under NZ IFRS 9.

The relevant key controls included:

- Governance over the development, validation and approval of the Bank's ECL models to assess compliance with NZ IFRS 9.
- Review and approval of key judgements, assumptions and forward looking information used in the ECL models.
- Interfaces and reconciliations of transfer of data inputs from source systems to the models.
- The review and approval process for the outputs of the ECL model and the adjustments and economic overlays that are applied to the modelled outputs, and disclosure of the NZ IFRS adoption.

Our procedures over the provisions for impairment on loans and advances included:

Collective Provision (Stage 1, 2, 3a)

- Consideration of the methodology inherent within the models against the requirement of NZ IFRS 9.
- Assessment of key assumptions in the ECL models, including staging, PD and LGD. This included using credit modelling specialists in our assessment.
- Assessment of the economic information used within, and weightings applied to, forward looking scenarios.
- Testing the accuracy and completeness of the key data inputs used in the ECL models by comparing it to the relevant supporting documents.

Key audit matter

• Overlays added to reflect the emerging trends or particular situations which are not otherwise captured by the impairment models.

How our audit addressed the key audit matter

- Recalculation of the ECL for a sample using the key assumptions in the models, such as PD and LGD.
- Consideration of the potential for the ECL provisions to be affected by events not captured by the Bank's ECL models, and assessing whether the overlays were appropriate in accordance with the Accounting Standards.
- We assessed the appropriateness of the Bank's transition disclosure in the financial statements in light of the requirements of New Zealand Accounting Standards.

Specific Provision (stage 3b)

- For a sample of individually assessed loans and advances, we examined the forward looking scenarios used and the weightings applied, including the Bank's cash flow forecasts supporting the impairment calculation in light of the requirement of NZ IFRS 9.
- We assessed the key judgements (in particular the amount and timing of recoveries) made by the Bank in the context of the borrowers' circumstances based on the detailed loan and counterparty information known by the Bank
- We compared the valuation of collateral held to external information where available.
- We assessed the appropriateness of the Bank's transition disclosure in the financial statements in light of the requirements of New Zealand Accounting Standards.

Information other than the financial statements, supplementary information and auditor's report

The Directors of the Bank (the 'Directors') are responsible for the other information included in the Disclosure Statement. The other information comprises the information required to be included in the Disclosure Statement in accordance with Schedule 2 of the Order and is included on pages 1 to 17 and the supplementary information entitled 'Bank Financial Strength Dashboard' on pages 65 to 67. Our opinion on the financial statements and supplementary information does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements and supplementary information, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the financial statements and supplementary information (excluding the supplementary information relating to capital adequacy and regulatory liquidity requirements)

The Directors are responsible, on behalf of the Bank, for the preparation and fair presentation of the financial statements in accordance with Clause 24 of the Order, NZ IFRS and IFRS and that give a true and fair view of the matters to which they relate. The Directors are also responsible for such internal control as the Directors determine are necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In addition, the Directors are responsible for the preparation and fair presentation of the supplementary information in the Disclosure Statement which complies with Schedules 2, 4, 7, 13, 14, 15 and 17 of the Order.

In preparing the financial statements, the Directors are responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Bank or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements and supplementary information (excluding the supplementary information relating to capital adequacy and regulatory liquidity requirements)

Our objectives are to obtain reasonable assurance about whether the financial statements and the supplementary information (excluding the supplementary information relating to capital adequacy and regulatory liquidity requirements disclosed in pages 26 to 31 inclusive and in Note 40 of the financial statements) disclosed in accordance with Clause 24 and Schedules 4, 7, 13, 14, 15 and 17 of the Order, are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (NZ) and ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located at the External Reporting Board's website at:

https://www.xrb.govt.nz/standards-for-assurance-practitioners/auditors-responsibilities/audit-report-2/

This description forms part of our auditor's report.

Report on other legal and regulatory requirements (excluding the supplementary information relating to capital adequacy and regulatory liquidity requirements)

We also report in accordance with the requirements of Clauses 2(1)(d) and 2(1)(e) of Schedule 1 of the Order. In relation to our audit of the financial statements and supplementary information (excluding the supplementary information relating to capital adequacy and regulatory liquidity requirements disclosed on pages 26 to 31 inclusive and in Note 40 of the financial statements) for the year ended 31 December 2018:

- (i) we have obtained all the information and explanations that we have required; and
- (ii) in our opinion, proper accounting records have been kept by the Bank as far as appears from an examination of those records.

Report on the review of the supplementary information relating to capital adequacy and regulatory liquidity requirements

We have examined and reviewed the supplementary information relating to capital adequacy and regulatory liquidity requirements required by Schedule 9 of the Order as disclosed on pages 26 to 31 and in Notes 40 of the financial statements of the Bank for the year ended 31 December 2018.

Our conclusion

Based on our review, nothing has come to our attention that causes us to believe that the supplementary information relating to capital adequacy and regulatory liquidity requirements disclosed on pages 26 to 31 and in Notes 40 of the financial statements of the Bank, is not in all material respects:

- (i) prepared in accordance with the Bank's conditions of registration; and
- (ii) disclosed in accordance with Schedule 9 of the Order.

This conclusion is to be read in the context of what we say in the remainder of this report.

Basis for our conclusion

We conducted our review in accordance with the New Zealand Standard on Review Engagements 2410 Review of Financial Statements Performed by the Independent Auditor of the Entity (NZ SRE 2410). Our responsibilities under this standard are further described in the Auditor's responsibilities for the review of the supplementary information relating to capital adequacy and regulatory liquidity requirements section of our report.

Responsibilities of the Directors for the supplementary information relating to capital adequacy and regulatory liquidity requirements

The Directors are responsible, on behalf of the Bank, for the preparation and fair presentation of the supplementary information relating to capital adequacy and regulatory liquidity requirements that is prepared in accordance with the Bank's conditions of registration and is disclosed in accordance with Schedule 9 of the Order. The Directors are also responsible for such internal control as the Directors determine are necessary to enable the preparation of the supplementary information relating to capital adequacy and regulatory liquidity requirements that is free from material misstatement, whether due to fraud or error.

Auditor's responsibilities for the review of the supplementary information relating to capital adequacy and regulatory liquidity requirements

Our responsibility is to express a conclusion, whether, based on our review, the supplementary information relating to capital adequacy and regulatory liquidity requirements disclosed on pages 26 to 31 and in Notes 40 of the financial statements of the Bank, is not, in all material respects:

- (i) prepared in accordance with the Bank's conditions of registration; and
- (ii) disclosed in accordance with Schedule 9 of the Order.

A review of the supplementary information relating to capital adequacy and regulatory liquidity requirements disclosed on pages 26 to 31 and in Notes 40 of the financial statements of the Bank in accordance with NZ SRE 2410 is a limited assurance engagement. The auditor performs procedures, primarily consisting of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. The procedures performed in a review are substantially less than those performed in an audit conducted in accordance with ISAs NZ and ISAs. Accordingly we do not express an audit opinion on the supplementary information relating to capital adequacy and regulatory liquidity requirements disclosed on pages 26 to 31 and in Notes 40 of the financial statements of the Bank.

Auditor independence

We are independent of the Bank in accordance with Professional and Ethical Standard 1 (Revised) *Code of Ethics for Assurance Practitioners* (PES 1) issued by the New Zealand Auditing and Assurance Standards Board and the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants* (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Other than in our capacity as auditor we have no relationship with, or interests in, the Bank. Partners and employees of our firm may deal with the Bank on normal terms within the ordinary course of trading activities of the business of the Bank. These matters have not impaired our independence as auditor of the Bank.

Who we report to

This report is made solely to the Bank's shareholder. Our work has been undertaken so that we might state those matters which we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Bank and the Bank's shareholder, for our work, for this report or for the opinions and conclusion we have formed.

The engagement partner on the engagement resulting in this independent auditor's report is Ashley Wood.

A (21.D 2010	 		A

The Bank does not take any equity risk.

6 Market risk peak end-of-day capital charges

6 months to 31 December 2018 in thousands of NZD	Implied risk weighted exposure	Aggregate capital charges
Interest rate risk	231,125	18,490
Foreign currency risk	32,250	2,580
Total	263,375	21,070

The Bank does not take any equity risk.

7 Method for deriving peak end-of-day aggregate capital charge

The market risk information is derived in accordance with the conditions of registration relating to capital adequacy and the Reserve Bank document entitled "Capital Adequacy Framework (Standardised Approach)" (BS2A).

8 Total capital requirements

		Risk weighted exposure or	
As at 31 December 2018 in thousands of NZD	Total exposure after credit risk mitigation	implied risk weighted exposure	Total capital requirement
Total credit risk	13,334,084	10,819,143	865,532
Operational risk	N/A	744,688	59,575
Market risk	N/A	241,375	19,310
Total	13,334,084	11,805,206	944,417

9 Capital ratios

	20	2018		2017	
		Minimum		Minimum	
		ratio		ratio	
in percentage (%) - As at year end	Ratio	requirement	Ratio	requirement	
Common Equity Tier 1 capital ratio	13.26%	4.50%	13.09%	4.50%	
Tier 1 capital ratio	13.26%	6.00%	13.09%	6.00%	
Total capital ratio	13.26%	8.00%	13.63%	8.00%	

10 Buffer ratio

in percentage (%)	2018	2017
Buffer ratio	5.26%	5.63%
Buffer ratio requirement	2.50%	2.50%

The buffer ratio is defined as the amount of Common Equity Tier 1 not required to meet the minimum capital ratio requirements. The above ratios are derived in accordance with the conditions of registration relating to capital adequacy and the Reserve Bank document entitled "Capital Adequacy Framework" (Standardised Approach) (BS2A).

11 Solo capital adequacy

in percentage (%)	2018*	2017*
Common Equity Tier 1 capital ratio	13.26%	13.09%
Tier 1 capital ratio	13.26%	13.09%
Total capital ratio	13.26%	13.63%

*The ratios above are derived in accordance with the conditions of registration relating to capital adequacy and the Reserve Bank document entitled "Capital Adequacy Framework (Standardised Approach)" (BS2A).

12 Pillar 2 capital for other material risks

in thousands of NZD	2018	2017
Internal capital allocation for other material risks	47,221	44,672

The Pillar 2 risks that the Bank has identified are described below:

(i) Credit concentration risk: Concentration risk of a loan portfolio is a function of the relative proportion of loans across industry sectors, geographic areas, specific borrowers, credit quality and size of exposures.

(ii) Liquidity risk: Liquidity risk is the combined risks of not being able to meet financial obligations as they fall due (funding liquidity risk); and that liquidity in financial markets may reduce significantly (market liquidity risk).

(iii) Reputation risk: Reputation risk is the potential that negative publicity, perception and/or loss of confidence regarding Rabobank New Zealand's business practices, whether true or not, will cause Rabobank New Zealand's clients, employees and other key stakeholders to lose trust in the organisation.

(iv) Strategic risk: Strategic risk is the risks affected or created by an organisation's business strategy and strategic objectives.

(v) Compliance risk: Compliance risk is the risk of legal or regulatory sanctions, material financial loss, or reputational damage an organisation may suffer as a result of its failure to comply with key laws, regualtory standards and industry codes applicable to its banking activities

The Bank has reviewed these other risks and does not believe any individual risk as being material and requiring a capital allocation. However, consistent with the Bank's ICAAP and the Bank's prudent capital management, it believes that 5% of Pillar 1 capital for Pillar 2 would provide sufficient capital given the current risk profile. The internal capital allocation for the Pillar 2 risks forms part of the internal capital buffer.

The Bank will review this allocation methodology every reporting period in line with industry practice as this area evolves over time.

13 Capital adequacy of the ultimate parent bank

Capital adequacy of Rabobank

Capital adequacy ratios for Rabobank are publicly available in the Rabobank Annual Report.

in percentage (%)	31/12/2018	31/12/2017
Common equity Tier 1 capital ratio	16.0%	15.8%
Tier 1 capital ratio	19.5%	18.8%
Total capital ratio	26.6%	26.2%

Rabobank is required by Dutch Central Bank DNB and European Central Bank ECB to hold minimum capital at least equal to that specified under Basel framework and those requirements imposed on it by the DNB and ECB have been met as at the reporting date.

Rabobank calculates the regulatory capital, the external required capital for credit risk, for virtually its entire loan portfolio on the basis of the Advanced Internal Rating Approach approved by the DNB. The Standardised Approach is applied, in consultation with DNB, to portfolios with relatively limited exposure and to a few smaller foreign portfolios that are not suited to the Advanced Internal Rating Approach. Operational risk is measured using the internal model approved by DNB that is based on the Advanced Measurement Approach. Regarding market risk, Rabobank has obtained permission from DNB to calculate the general and specific position risk using its own internal value-at-risk (VaR) models, based on the rules of CAD II (Capital Adequacy Directive).

Rabobank's Capital Adequacy and Risk Management Report (pillar 3) are publicly available on *https://www.rabobank.com/en/images/annual-report-2018.pdf*

14 Regulatory liquidity ratios

	3 months to	3 months to
Capital ratios	30/09/2018	31/12/2018

Quarterly average one-month mismatch ratio	7%	6%
Quarterly average one-week mismatch ratio	7%	6%

Credit Exposures to Connected Persons

1 Concentration of credit exposures to connected persons

		Exposures as a % of Banking Group's tier one
	Exposures	capital
As at 31 December 2018	in thousands of NZD	%
Bank connected persons		
Aggregate at end-of-period	988	0.06
Peak end-of-day for the year	16,983	1.09
Contingent credit exposures arising from risk lay-off arrangements	-	-
Non-bank connected persons		
Aggregate at end-of-period	-	-
Peak end-of-day for the year	-	_
Contingent credit exposures arising from risk lay-off arrangements	-	-

As at 31 December 2018, the Banking Group's rating-contingent connected exposure limit was net 40% of Tier One Capital, with regulatory recognition of netting arrangements being in place. Within the rating-contingent limit, credit exposures (of a non-capital nature and net of any allowances for impairment) to non-bank connected persons shall not exceed 15% of the Banking Group's Tier One Capital. Aggregate gross exposures to connected persons must not exceed 125% of the Banking Group's Tier One Capital.

The peak end-of-day credit exposure is measured by taking the maximum end-of-day aggregate credit exposure during the year and dividing it by the Banking Group's Tier One Capital as at the end of the year.

The information on credit exposure to connected persons has been derived in accordance with Rabobank New Zealand Limited's conditions of registration and Connected Exposures Policy (BS8), and is net of individual credit impairment allowances, excluding advances of a capital nature and gross of set-offs.

Credit exposure is calculated on the basis of actual exposure.

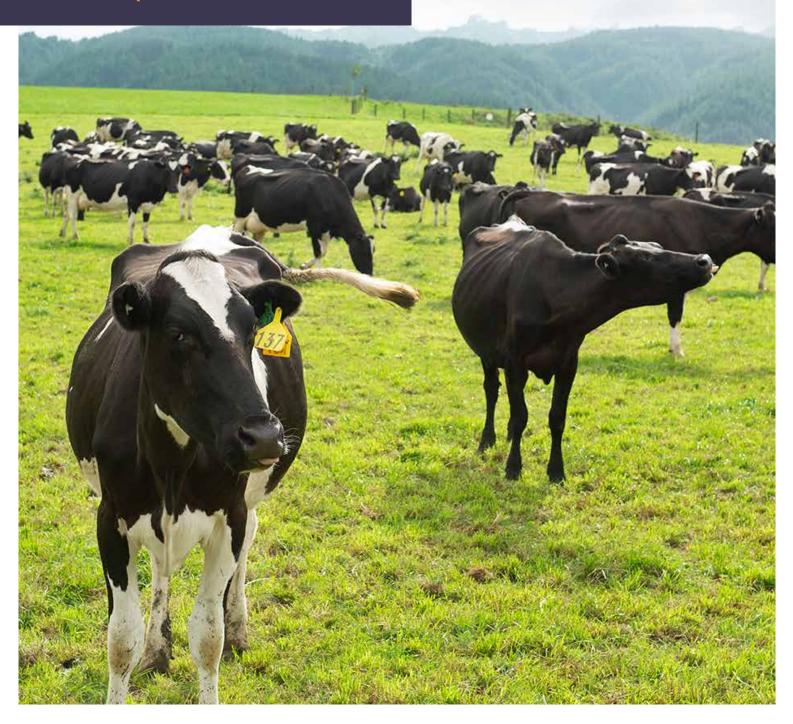

The Banking Group has no individual credit impairment allowances provided against credit exposures to connected persons as at the balance date.

1 Reporting entity

Rabobank New Zealand Limited (the "Bank") is a limited liability company incorporated and domiciled in New Zealand and registered under the Companies Act 1993. The Bank is a profit-oriented entity for the purpose of preparing this financial report. The Bank is an issuer for the purposes of the Financial Markets Conduct Act 2013. Financial statements for the Bank are presented as at and for the year ended 31 December 2018.

The registered office is at Level 23,157 Lambton Quay, Wellington, New Zealand.

The Bank is wholly owned by Rabobank International Holding B.V. and its ultimate parent entity is Coöperatieve Rabobank U.A. ("Rabobank"), trading as Rabobank and domiciled in the Netherlands.

The principal activities of the Bank during the financial year were the provision of secured loans predominantly to borrowers in the rural sector and the raising of retail deposits. There were no significant changes during the year in the nature of the activities of the Bank.

2 Basis of preparation

2.1 Statement of compliance

The financial statements have been prepared and presented in accordance with the requirements of the Financial Markets Conduct Act 2013, the Reserve Bank of New Zealand Act 1989, and Generally Accepted Accounting Practice in New Zealand ("NZ GAAP"). They comply with New Zealand equivalents to International Financial Reporting Standards (NZ IFRS) and other authoritative pronouncements of the External Reporting Board, as appropriate for for-profit entities. These financial statements also comply with International Financial Reporting Standards (IFRS).

These financial statements were approved and authorised for issue by the board of directors on 26 March 2019.

2.2 Basis of measurement

These financial statements have been prepared under the historical cost convention, except for financial assets at fair value through other comprehensive income (FVOCI) (2017: available-for-sale (AFS) financial assets) and derivative financial instruments which have been measured at fair value. The going concern assumption and the accrual basis of accounting have been adopted.

2.3 Functional and presentation currency

Items included in the financial statements of the Bank are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The financial statements are presented in New Zealand dollars (NZD), which is the Bank's functional and presentation currency. All financial information presented in NZD has been rounded to the nearest thousand unless otherwise stated.

2.4 New and amended standards adopted by the Bank

The Bank has applied the following standards and amendments for the first time for the annual reporting period commencing 1 January 2018:

- NZ IFRS 9 Financial Instruments;
- NZ IFRS 15 Revenue from Contracts with Customers;

The Bank had to change its accounting policies and make certain adjustments following the adoption of NZ IFRS 9. This is disclosed in note 2.6. NZ IFRS 15 did not have any material impact on the amounts recognised in prior periods and does not materially affect the current or future periods.

2 Basis of preparation (continued)

2.5 Significant accounting judgments and estimates

The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts for assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. This primarily concerns the determination of the taxes, determination of the fair value of assets and liabilities and determination of impairment. This involves an assessment of the situations, based on the financial data and information available. Although these assessments are made based on the best estimate by the management of current events and actions, actual results may vary from these estimates. If different assumptions or estimates were applied, the resulting value would change, impacting the net assets and income of the Bank.

The most significant uses of judgment and estimates are as follows:

2.5.1 Fair value of financial instruments

The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly manner between market participants at the measurement date.

Fair value is obtained from quoted market prices, independent dealer price quotations and discounted cash flow models, which incorporate current market and contractual prices for the underlying instrument, time to expiry and yield curves. The calculation of fair value for any financial instrument may also require a degree of judgment to adjust the quoted price or model value to reflect the cost of credit risk (where not embedded in underlying models or prices used).

The majority of outstanding derivative positions are transacted over-the-counter and therefore need to be valued using valuation techniques.

The valuation of financial instruments is described in more detail in note 33.

2.5.2 Impairment of financial assets

The Bank applies the three-stage expected credit loss (ECL) impairment models for measuring and recognising expected credit losses which involve a significant degree of management judgement. The impairment methodology results in the recognition of allowances measured at an amount equal to 12-month expected credit losses (stage 1); allowances measured at an amount equal to lifetime expected credit losses for financial assets for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets (stage 2); and financial assets that are credit-impaired (stage 3).

The Bank uses estimates and management judgement in the determination of the expected credit loss for the following attributes:

- Significant increase in credit risk: judgement is required to transfer assets from stage 1 to stage 2.
- Forward-looking information: the estimation of expected credit losses for each stage and the assessment of significant increases in credit risk consider information about past events and current conditions as well as reasonable and supportable forecasts of future events and economic conditions (forward looking information). The estimation of forward-looking information may require significant judgement.
- Macro-economic scenarios: The Bank uses three global macroeconomic scenarios (consisting of a baseline, a baseline minus and a baseline plus scenario, which are probability weighted) in their ECL models to determine the expected credit losses. The expected cred-it loss on a financial asset should be based on an unbiased probability-weighted amount that is determined by evaluating a range of possible and reasonable outcomes and should reflect information available on current conditions and forecasts of future economic conditions, such as gross domestic product growth, unemployment rates and interest rates. These forward-looking macroeconomic forecasts require judgment and are partly based on internal Rabobank research.
- Measurement of expected credit losses: The probability of default (PD) x loss given default (LGD) x exposure at default (EAD) inputs are used to estimate expected credit losses. These inputs require estimates in the following way:

PD – The probability of default is an estimate of the likelihood of default over a given time horizon.

2 Basis of preparation (continued)

2.5.2 Impairment of financial assets (continued)

EAD – The exposure at default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after reporting date.

LGD – The loss given default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that Rabobank would expect to receive, including cash flows expected from collateral and other credit enhancements.

- Measurement of individually assessed financial asset: For credit-impaired financial assets that are assessed on an individual basis, a discounted cash flow calculation is performed. In many cases, judgement is required for the estimation of the expected future cash flows and the weighting of the three scenarios.

2.5.3 Tax

When determining the tax expense and the related current and deferred tax due and tax credits, estimates are used. The fiscal treatment of transactions is not certain in every case and provisions for tax are held to reflect these uncertainties. The tax due and tax credits proposed are based on all known information, and where relevant, external advice.

Differences between the final outcome and the figures adopted in these financial statements are shown in the current and deferred tax due and tax credits for the period when certainty is gained as to the fiscal treatment and/or when the tax assessments are imposed.

2.6 Changes in accounting policies

The Bank has adopted two changes in accounting policies during the year being NZ IFRS 15 and NZ IFRS 9.

NZ IFRS 9 Financial Instruments

NZ IFRS 9 was adopted (replacing NZ IAS 39) from 1 January 2018 and contains new accounting requirements for financial assets and liabilities, including classification and measurement, impairment and general hedge accounting. It specifies a simpler methodology for classifying and measuring financial assets, with two primary measurement categories: amortised cost and fair value. The general hedge accounting provisions are more principle based, allowing closer alignment between accounting and risk management practices. The standard also requires entities to account for expected credit losses from when financial instruments are first recognised and to recognise full lifetime expected losses on a more timely basis.

The adoption of NZ IFRS 9 resulted in changes in the accounting policies for recognition, classification and measurement of financial assets and liabilities and impairment of financial assets. As permitted by the transitional provisions of NZ IFRS 9, the Bank elected not to restate comparative figures. Any adjustments to the carrying amounts of financial assets and liabilities at the date of transition were recognised in the opening retained earnings. Prior period financial statements were prepared in accordance with NZ IAS 39 and these accounting policies are disclosed in prior period financial statements. Consequently, for notes disclosures, the consequential amendments to NZ IFRS 7 disclosures have also only been applied for current period. The comparative period notes disclosures repeat those disclosures made in prior period.

Set out below are disclosures relating to the impact of the adoption of NZ IFRS 9 on the Bank. Further details of the specific NZ IFRS 9 accounting policies applied in the current period are described in more detail in section 3.

2 Basis of preparation (continued)

2.6 Changes in accounting policies (continued)

Key impacts of the implemenation of NZ IFRS 9

The implementation of NZ IFRS 9 resulted in an increase of the impairment allowance of financial assets of NZD \$2,691 thousand as a result of the new expected credit loss impairment model. This was offset by NZD \$2,497 thousand increase in carrying amount of loans and advance due to restatement of interest foregone on impaired loans which was not recognised under NZ IAS 39. This movement and all other movements due to the NZ IFRS 9 implementation are disclosed in the following table which shows a reconciliation between the Statement of Financial Position as reported per 31 December 2017 under NZ IAS 39 and the restated amounts per 1 January 2018 under NZ IFRS 9.

Statement of Financial Position

2.6 Changes in accounting policies (continued)

Classification and measurement

The following table summarises the impact on classification and measurements to the Bank's financial assets and liabilities on 1 January 2018:

		Classification and Measurement Category	Classification and Measurement Category	As at 1 Jan Carrying amount	uary 2018 Carrying amount
In thousands of NZD	Note	under NZ IAS 39	under NZ IFRS 9	under NZ IAS 39	under NZ IFRS 9
Financial Assets					
Cash and cash equivalents		Loans and receivables	Amortised cost	338,506	338,506
Derivative financial instruments		Fair value through	Fair value through	3,859	3,859
		profit or loss	profit or loss		
Available-for-sale financial assets	(a)	Available for sale	Fair value through	595,315	595,315
			other comprehensive income	2	
Loans and advances		Loans and receivables	Amortised cost	9,995,242	9,995,221
Due from related entities		Loans and receivables	Amortised cost	365,904	365,731
Other assets		Loans and receivables	Amortised cost	4,853	4,853

There were no changes in the classification and measurement of financial liabilities of the Bank.

(a) Debt instruments that were previously classified as available for sale financial assets and carried at fair value through other comprehensive income (FVOCI) were assessed to have a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and accordingly, are classified at FVOCI under NZ IFRS 9 and included in "financial assets at fair value through other comprehensive income" in the statement of financial position as at 1 January 2018.

Reconciliation of impairment allowances

The following table reconciles the impairment allowances determined in accordance with NZ IAS 39 as at 31 December 2017 to the impairment allowances in accordance with NZ IFRS 9 as per 1 January 2018. The NZ IAS 39 impairment methodology was based on an 'incurred loss' model, meaning that an allowance is determined when an instrument is credit-impaired, that is, when a loss event has occurred that had a detrimental impact on estimated future cash flows. This will generally align with the stage 3 category of NZ IFRS 9. However, within the expected credit loss framework of NZ IFRS 9 the entire portfolio of financial instruments will be assigned an impairment allowance through the additions of the 12-month ECL category (stage 1) and the Lifetime ECL Non-Credit-Impaired (stage 2), generally leading to increases in overall allowances.

In thousands of NZD				
Total impairment allowances as at 31 Decem	nber 2017 in accordance wi	th NZ IAS 39		32,785

2.6 Changes in accounting policies (continued)

NZ IFRS 15 Revenue from Contracts with Customers

NZ IFRS IFRS 15 was adopted (replacing NZ IAS 18) from 1 January 2018 and provides a principles-based approach for revenue recognition, and introduces the concept of recognising revenue for obligations as they are satisfied. The standard does not apply to financial instruments, insurance contracts or lease contracts and consequently has had no materiall impact on the revenue recognition for the Bank. This is because the majority of the Bank's revenues (being interest income) is outside of the scope of NZ IFRS 15. Interest income is recognised in accordance with NZ IFRS 9. The Bank has no trail comission income.

NZ IAS 1 Presentation of Financial Statements

As a result of a change in NZ IAS 1 due to the implementation of NZ IFRS 9, interest income on financial assets using the effective interest method should be presented separately in the Statement of Comprehensive Income. Interest income on financial assets using the effective interest method includes interest income on 'Loans and advances to banks', 'Loans and advances to customers' and 'Financial assets at fair value through other comprehensive income'. The Bank does not derive interest income on financial assets that do not use the effective interest method.

3 Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

3.1 Revenue and expense recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Bank and the revenue can be reliably measured. The principal sources of revenue are interest income, fees and commissions.

3.1.1 Interest income and expense

For all interest bearing financial instruments, interest income or expense are recognised in profit or loss using the effective interest method. The effective interest method calculates the amortised cost of a financial instrument and allocates the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, a shorter period, where appropriate) to the net carrying amount of the financial asset or liability. The calculation includes all transaction costs and fees that are directly attributable to the instrument and are an integral part of the effective interest method. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability.

3.1.2 Fee and commission income and expense

Fee and commission income and expense that are integral to the effective interest rate on a financial asset or liability are capitalised and included in the effective interest rate, and recognised in profit or loss over the expected life of the instrument. Commitment fees to originate a loan, which is unlikely to be drawn down, are recognised as fee income over the commitment period.

Fees and commissions that relate to the execution of a significant act (for example, advisory or arrangement services, placement fees and underwriting fees) are recognised when the significant act has been completed. Fees charged for providing ongoing services (for example, maintaining and administering existing facilities) are recognised as income over the period the service is provided.

Fees and commissions paid for guarantees on deposits and other liabilities are recognised as an expense over the period the guarantee is provided.

3.1.3 Other expenses

Operating expenses are recognised on an accrual basis.

Management expenses are charged to the Bank to reflect the cost of resources and services provided by related parties.

3.2 Foreign currency

Foreign currency transactions are translated into the functional currency, using the exchange rates prevailing at the dates of the transactions. Monetary assets and liabilities resulting from foreign currency transactions are subsequently translated at the spot rate at reporting date.

Translation differences arising on the settlement of monetary items, or on translating monetary items at rates different to those at which they were initially recognised or included in a previous financial report, are recognised in the statement of comprehensive income in the period in which they arise.

Translation differences on non-monetary items are reported as part of the fair value gains or losses on these items. Translation differences on non-monetary items measured at fair value through equity, such as securities classified as fair value through other comprehensive income financial assets, are recognised in equity through other comprehensive income.

3 Significant accounting policies (continued)

3.3 Income tax

Income tax expense comprises of current tax and movements in deferred tax balances. Income tax expense is recognised in the statement of comprehensive income, except to the extent that it relates to items recognised directly in equity or in other comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates that have been enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding amounts used for taxation purposes. Deferred tax assets and liabilities are not recognised if the temporary difference arises from goodwill, the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting profit nor taxable profit or loss, and temporary differences associated with investments in subsidiaries to the extent that they probably will not reverse in the foreseeable future.

The amount of deferred tax provided is based on the expected realisation or settlement of the carrying amount of assets and liabilities, using tax rates that have been enacted or substantively enacted at the reporting date and that are expected to apply to the temporary differences when they reverse.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

3.4 Financial assets

3.4.1 Classification of financial assets

From 1 January 2018, the Bank classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI, or through profit or loss), and
- those to be measured at amortised cost.

The classification depends on:

1. Business model assessment:

The Bank assesses its business models at a level that reflects how financial assets are managed seen from a strategic point of view. The Bank considers all relevant evidence available at the assessment date, such as how the performance of the business model and the financial assets held in that model is evaluated and reported. And how the risks affecting the performance of the business model are managed. This assessment results in the following business models:

- Hold to collect: where the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; or
- Hold to collect and sell: where the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; or
- Other business model.

2. Contractual cash flow assessment:

The Bank assesses whether the cash flows of the financial assets are solely payment of principal and interest on the principal amount outstanding (SPPI test) and, hence, consistent with basic lending arrangements. In basic lending arrangements, the consideration for the time value of money and credit risk are typically the most significant elements of interest. However in such arrangements, interest may also include consideration for other basic lending risks (such as liquidity risk) and costs (such as administrative costs) associated with holding financial assets for a particular period of time. Additionally, interest may include a profit margin consistent with a basic lending arrangement.

3 Significant accounting policies (continued)

3.4 Financial assets (continued)

The business model assessment can be made on a portfolio basis, whereas the contractual cash flow assessment is assessed for each individual financial asset. Rabobank only reclassifies debt instruments when the business model for managing those assets changes.

A debt instrument that is held within a business model "hold to collect" and meets the SPPI test is measured at amortized cost unless the asset is designated at fair value through profit or loss. A debt instrument that is held within a business model "hold to collect and sell" and meets the SPPI test is measured at fair value with fair value adjustments recognized in other comprehensive income unless the asset is designated at fair value through profit or loss. All other debt instruments are mandatorily measured at fair value through profit or loss.

The Bank does not hold equity instruments.

3.4.2 Measurement of financial assets

At initial recognition, the Bank measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets measured at fair value through profit or loss are expensed in profit or loss. Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest. Derivative financial instruments are recognised initially at fair value and are subsequently measured at fair value through profit or loss.

Subsequent measurement of debt instruments depends on the Bank's business model for managing the asset and the cash flow characteristics of the asset.

3.4.3 Loans and advances

Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost and presented as 'Loans and advances to customers' or 'Due from other financial institutions' or 'Due from related entities'. At initial recognition, the Company measures these financial assets at its fair value plus transaction costs that are directly attributable to the acquisition of the financial asset.

Interest income from these financial assets is included in net interest income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in 'gains/ (losses) arising from the derecognition of financial assets measured at amortised cost'. Impairment losses are included in 'Impairment losses' in the Statement of Comprehensive Income.

3.4.4 Cash and cash equivalents

Cash equivalents are highly liquid short-term investments held to meet current obligations in cash, rather than for investments or other purposes. Such investments have remaining terms of less than 90 days at inception. It includes cash at bank, central bank settlement accounts and nostro balances. Cash equivalents are readily convertible to known amounts of cash and subject to an insignificant risk of changes in value.

3.4.5 Derivative financial instruments

Derivative financial instruments are contracts whose value is derived from one or more underlying price, index or other variability. They include foreign exchange contracts, options, interest rate swaps, commodity derivatives and currency swaps. Derivative financial instruments are used as part of the Bank's sales and trading activities.

All derivative financial instruments are recognised at fair value. The fair value is determined using listed market prices, prices offered by brokers or cash flow discounting models based on current market prices and contracted prices for the underlying instruments, as well as the time value of money, yield curves and the volatility of the underlying assets and liabilities.

All derivative financial instruments are included under assets if their fair value is positive and under liabilities if their fair value is negative. This fair value hierarchy is described in more detail in note 33.

3 Significant accounting policies (continued)

3.4 Financial assets (continued)

3.4.6 Financial assets at fair value through other comprehensive income

Investments in debt instruments are measured at fair value through other comprehensive income where they have:

- contractual terms that give rise to cash flows on specified dates, that represent solely payments of principal and interest on the principal amount outstanding; and
- are held within business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.

These debt instruments are initially recognised at fair value plus direct attributable transaction costs and subsequently measured at fair value. Gains and losses arising from changes in fair value are included in other comprehensive income within a separate component of equity. Impairment gains and losses and interest revenue are recognised in profit and loss. Upon disposal, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to the income statement.

3.4.7 Finance leases

Leases where the Bank as lessor transfers substantially all the risks and rewards incident to ownership of an asset to the lessee or a third party are classified as finance leases. Upon initial recognition the leased asset is presented as a receivable and measured at an amount equal to the net investment in the lease.

NZ IAS 17 Leases requires income on finance lease transactions to be recognised on a basis reflecting a constant periodic return based on the lessor's net investment outstanding in respect of the finance lease. The difference between the gross receivable and the present value of the receivable is unearned finance income and is recognised over the term of the lease using the effective interest method.

3.4.8 Offsetting

Offsetting of income and expenses

Income and expenses are not offset unless required or permitted by an accounting standard. It generally arises in the following circumstances:

- where transaction costs form an integral part of the effective interest rate of a financial instrument which is measured at amortised cost, these are offset against the interest income generated by the financial instrument; or
- where gains and losses relating to fair value hedges are assessed as being effective; or
- where gains and losses arise from a group of similar transactions, such as foreign exchange gains and losses.

Offsetting assets and liabilities

Assets and liabilities are offset and the net amount reported in the statement of financial position only where there is:

- a current enforceable legal right to offset the asset and liability; and
- an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

3.4.9 Regular way purchase and sale of financial assets

All financial assets and liabilities are initially recognised on the trade date. This includes 'regular way trades': purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place.

3 Significant accounting policies (continued)

3.4 Financial assets (continued)

3.4.10 Derecognition of financial assets

Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Bank has transferred substantially all the risks and rewards of ownership. In transactions where substantially all the risks and rewards are neither retained nor transferred, the Bank derecognises the assets when control is no longer retained, or when control is retained, the assets are recognised to the extent of the Company's continuing involvement.

3.5 Impairment of financial assets

Impairment allowances apply to financial assets at amortised cost and financial assets at fair value through OCI, as well as to lease receivables, contract assets, trade receivables, certain loan commitments and financial guarantees. At initial recognition, an allowance is recognised for the amount of the expected credit losses from possible defaults in the coming 12 months (stage 1). If credit risk increased significantly since origination (but remains non-credit-impaired), an allowance will be required for the amount that equals the expected credit losses from possible defaults during the expected lifetime of the financial asset (stage 2). If the financial instrument becomes credit-impaired the allowance will remain at the Lifetime ECL (stage 3). Stage 3 allowance is assessed either on collective (stage 3A) or individual (stage 3B) basis. For these instruments the interest income will be recognised by applying the effective interest rate on the net carrying amount (including the allowance). Financial instruments become credit-impaired when one or more events have occurred that had an adverse impact on estimated future cash flows.

Two fundamental drivers of the NZ IFRS 9 impairments requirements are a) the methodology for the measurement of 12-Month and Lifetime Expected Credit Losses and b) the criteria used to determine whether a 12-month ECL (stage 1), Lifetime ECL non-credit-impaired (stage 2), or Lifetime ECL credit-impaired (stage 3) should be applied (also referred to as stage determination criteria).

a) Methodology to determine expected credit losses

In order to determine ECLs the Bank utilises point in time Probability of Default (PD) x Loss Given Default (LGD) x Exposure at Default (EAD) models for the majority of the portfolio in scope. Three global macroeconomic scenarios (consisting of a baseline, a baseline minus and a baseline plus scenario) are incorporated into these models and probability weighted in order to determine the expected credit losses. For credit-impaired financial assets that are assessed on an individual basis (stage 3B), a discounted cash flow calculation is performed which is based on the weighted average of the net present value of expected future cash flows in three different scenarios: a sustainable cure, an optimizing and a liquidation scenario.

When unexpected external developments or data quality issues are not sufficiently covered by the outcome of the ECL models, an adjustment will be made.

b) Stage determination criteria

In order to allocate financial instruments in scope between stage 1, stage 2 and stage 3 a framework of qualitative and quantitative factors has been developed. The criteria for allocating a financial instrument to stage 3 are fully aligned with the criteria for assigning a defaulted status, for example 90 days past due status, or if a debtor is likely to become unable to pay its credit obligations without liquidation of collateral by the Bank. In order to allocate financial instruments between stages 1 and 2, Rabobank uses criteria, such as days past due status, special asset management status and deterioration of the PD since origination.

For portfolios without individual PD's or with PD's that are not updated on a frequent basis such that an assessment of the change in PD is not possible, a collective assessment on groups of financial instruments with shared credit risk characteristics is made for the purpose of stage determination.

3 Significant accounting policies (continued)

3.5 Impairment of financial assets (continued)

Significant increases in credit risk (SICR)

At each reporting date, the Bank assesses whether the credit risk on financial instruments has increased significantly since initial recognition. There is a rebuttable presumption that the credit risk on a financial asset has increased significantly since initial recognition when the contractual payments are over 30 days past due. The rebuttable presumption is not an absolute indicator that lifetime ECL should be recognised, but is presumed to be the latest point at which lifetime ECL should be recognised.

The assessment of whether lifetime ECL are recognized is based on significant increases in the likelihood or default risk occurring since initial recognition – irrespective of whether a financial instrument has been repriced to reflect an increase in credit risk – instead of based on evidence of a financial instrument being credit-impaired at the reporting date or an actual default occurring. Generally, there will be a SICR before a financial instrument becomes credit impaired or an actual default occurs. For loan commitments, the Bank considers changes in the default risk occurring on the loan to which a loan commitment relates. For financial guarantee contracts, it considers the changes in the risk that the specified debtor will default on the contract.

The assessment of changes in credit risk analysis is a multifactor and holistic analysis. Whether a specific factor is relevant (and its weight compared to other factors) depends on the type of product, characteristics of the financial instruments and the borrower as well as geographical region. The methods used to determine whether credit risk on financial instruments has increased significantly since initial recognition considers the mentioned characteristics of the instruments (or a group of instruments) and the default patterns in the past for comparable financial instruments.

Default definition

In defining default for the purposes of determining the risk of a default occurring, the Bank applies a default definition consistent with the definition used for internal credit risk management purposes for the relevant financial instrument and considers qualitative indicators when appropriate.

However, there is a rebuttable presumption that default does not occur later than when a financial asset is 90 days past due, unless Rabobank has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate. The definition of default used for these purposes is applied consistently to all financial instruments, unless information becomes available that demonstrates that another default definition is more appropriate for a particular financial instrument.

Collective versus individual assessment

Some factors or indicators may not be identifiable on an individual instrument level. In that case, the factors or indicators are assessed for appropriate portfolios, groups of portfolios or a portion of a portfolio to determine whether the requirements for recognition of lifetime ECL have been met. The aggregation of financial instruments to assess whether there are changes in credit risk on a collective basis may change over time when new information becomes available on groups of, or individual, financial instruments.

Depending on the nature of the financial instruments and the credit risk information available for particular groups of financial instruments, Rabobank may not be able to identify SICR for an individual instrument before that instrument becomes past due. This may be the case for financial assets (such as retail loans) for which there is little or no updated credit risk information routinely obtained and monitored on an individual instrument level until a customer breaches the contractual terms. If changes in the credit risk for an individual instrument is not captured before it becomes past due, a loss allowance based solely on credit information at an individual instrument level would not represent the changes in credit risk since initial recognition.

In some circumstances, the Bank has no reasonable and supportable information available without undue cost or effort to measure lifetime ECL on an individual instrument basis. Lifetime ECL is then recognized by collectively considering comprehensive credit risk information, which not only incorporates past due information but also all relevant credit information (including forward-looking macroeconomic information) to approximate the result of recognizing lifetime ECL when there has been a SICR since initial recognition on an individual instrument level.

3 Significant accounting policies (continued)

3.5 Impairment of financial assets (continued)

For the purpose of determining SICR and recognizing a loss allowance on a collective basis, the Bank may group financial instruments based on shared credit risk characteristics with the objective of facilitating an analysis designed to enable SICR to be identified on a timely basis. However, when Rabobank is unable to group financial instruments for which the credit risk is considered to have increased significantly since initial recognition based on shared credit risk characteristics, it recognizes lifetime ECL on a portion of the financial instruments for which credit risk is deemed to have increased significantly.

Shared credit risk characteristics may include but are not limited to: instrument types, credit risk ratings, collateral types, initial recognition dates, remaining terms to maturity, industries, geographical location, and collateral value relative to the financial instrument if it has an impact on the PD (for instance, non-recourse loans in some jurisdictions or LTV ratios).

3.5.1 Past due loans

Past due loans are where payments are overdue. Adequate security is held to cover amounts owing including unpaid principal and interest in arrears. Interest due but not received is taken to interest income until the loan is classified as non-accrual. This did not change under NZ IFRS 9.

3.5.2 Restructured assets

Restructured assets are those impaired loans on which the original contractual terms have been formally modified due to the financial difficulties of borrowers, and on which interest continues to be accrued at a rate which is equal to or greater than the Bank's average cost of funds at the date of restructuring. This did not change under NZ IFRS 9.

3.6 Property, plant and equipment

Property, plant and equipment are carried at cost, which includes direct and incremental acquisition cost, less accumulated depreciation and impairments if applicable. Subsequent costs are capitalised only when it increases the future economic benefits embodied in the item of property, plant and equipment. All other expenditure is expensed as incurred. Straight-line depreciation is applied to these assets in accordance with the schedule below. Each asset is depreciated to its residual value over its estimated useful life:

Office fixtures & fittings	10 years
Office equipment	5 years
Computer hardware	5 years

Each year, the Bank assesses whether there are indications of impairment of property, plant and equipment. If the carrying amount of an asset exceeds its estimated recoverable amount, the carrying amount is written down immediately to its recoverable amount. Impairment losses of property, plant and equipment are included in the statement of comprehensive income. Gains and losses on the disposal of items of property, plant and equipment are determined in proportion to their carrying amounts and taken into account when determining the operating result.

3.7 Intangible assets

Other intangible assets consist of acquired and internally developed computer software and are stated at cost less accumulated amortisation and impairment if any.

Internal and external costs directly incurred in the purchase or development of computer software, including subsequent upgrades and enhancements, are recognised as intangible assets when it is probable that they will generate future economic benefits attributable to the Bank. These assets are amortised using the straight-line method over their estimated useful life of five years.

3.8 Other assets

Other assets include interest, fees, other income receivable, and all other financial assets. These are measured at amortised cost using the effective interest method. All other non-financial assets are recorded at the cash value to be realised when settled.

3 Significant accounting policies (continued)

3.9 Impairment of non-financial assets

The Bank assesses at each reporting date whether there is an indication that a non-financial asset may be impaired. If any such indication exists or when annual impairment testing for an asset is required, the Bank estimates the asset's recoverable amount.

An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount. The recoverable amount of an asset is the higher of its fair value less costs to sell and its value in use. In assessing its value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the corresponding impairment loss is recognised immediately in the statement of comprehensive income.

A previously recognised impairment loss is assessed at each reporting date for any indications that the loss has decreased or no longer exists. A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the recoverable amount since the last impairment loss was recognised.

3.10 Financial liabilities

The Bank classifies significant financial liabilities in the following categories: due to other financial institutions, deposits, due to related entities, subordinated debt and other liabilities. Financial liabilities are recognised when an obligation arises and derecognised when it is discharged, cancelled or expired.

Financial liabilities are initially recognised at fair value less transaction costs, except where they are designated at fair value, in which case transaction costs are expensed as incurred. They are subsequently measured at amortised cost, except for derivatives and financial liabilities at fair value, which are held at fair value through profit or loss.

3.10.1 Due to other financial institutions, deposits and due to related entities

Due to other financial institutions includes deposits placed by other financial institutions, Vostro balances, bank overdrafts and settlement account balances due to other financial institutions. Deposits include term deposits, savings deposits and other demand deposits. Due to related entities includes deposits and settlement account balances due to related parties.

They are brought to account at fair value plus directly attributable transaction costs at inception, and are subsequently measured at amortised cost. Interest expense and yield related fees are taken to the Statement of Comprehensive Income using the effective interest method.

3.10.2 Subordinated debt

Subordinated debt is brought to account at the fair value, including directly attributable transaction costs at inception, and subsequently measured at amortised cost. Interest expense is recognised in the statement of comprehensive income using the effective interest method.

3.10.3 Other liabilities

Other liabilities include interest, fees and other accrued expenses payable and all other financial liabilities. They are recognised initially at their fair value, and subsequently measured at the carrying value to be paid when settled.

3.10.4 Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled, or expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the Statement of Comprehensive Income.

3 Significant accounting policies (continued)

3.10.5 Contingent liabilities

Contingent liabilities mainly include financial guarantees and lending commitments.

Financial guarantees are contracts that require the Bank to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument.

Lending commitments are defined amounts (unutilised credit lines or undrawn portions of credit lines) against which clients can borrow money under defined terms and conditions.

Financial guarantees and other contingent liabilities are accounted for as off balance sheet items. Provisioning for these exposures is calculated under NZ IAS 37 'Provisions, Contingent Liabilities and Contingent Assets'.

3.11 Provisions

A provision is recognised if the Bank has a present obligation (legal or constructive) as a result of a past event, if it is probable that an outflow of resources will be required to settle the obligation and if a reliable estimate can be made of the amount of the obligation.

A provision for dividends is recognised when dividends are declared by the directors.

3.12 Employee benefits

3.12.1 Wages and salaries and annual leave

Liabilities for wages and salaries, including non-monetary benefits and annual leave expected to be settled within 12 months for the reporting date, are recognised in other liabilities in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid when the liabilities are settled. Liabilities for annual leave are recognised when the leave is accrued and measured at the rates paid or payable.

3.12.2 Long service leave

The liability for long service leave is recognised in the provision for the employee entitlements and measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date. Consideration is given to expected future wage and salary levels, experience of employee turnover and periods of service.

3.13 Equity

3.13.1 Contributed equity

Contributed equity consists of ordinary share capital and is the amount of fully and partly paid up capital from the issue of ordinary shares.

Incremental costs directly attributable to the issuance of new shares are shown in equity as a deduction, net of tax, from the proceeds.

3.13.2 Reserves

Fair value through other comprehensive income (FVOCI) financial assets revaluation reserve

This reserve includes changes in the fair value of FVOCI financial assets, net of tax. These changes are transferred to the statement of comprehensive income when the asset is derecognised or impaired.

3 Significant accounting policies (continued)

3.14 Goods and services tax

Income, expenses, assets and liabilities are recognised net of the amount of Goods and Services Tax (GST) except where the GST incurred on purchase of goods and services is not recoverable from the taxation authority. The non-recoverable GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable.

The net amount of GST recoverable from, or payable to the taxation authority, is included as part of receivables or payables in the balance sheet. Cash flows are included in the statement of cash flows on a gross basis and the GST component of cash flows arising from investing and financing activities which is recoverable from, or payable to the taxation authority, are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to the taxation authority.

3.15 Accounting standards not early adopted

A number of new standards are effective for annual periods beginning after 1 January 2019 and earlier application is permitted; however, the Bank has not early adopted the new or amended standards in preparing these financial statements. Of those standards that are not yet effective, NZ IFRS 16 is expected to have a material impact on the Bank's financial statements in the period of initial application.

NZ IFRS 16 Leases

NZ IFRS 16 introduces a single, on-balance sheet lease accounting model for lessees. A lessee recognises a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. There are recognition exemptions for short-term leases and leases of low-value items. Lessor accounting remains similar to the current standard – i.e. lessors continue to classify leases as finance or operating leases. NZ IFRS 16 replaces existing leases guidance.

The Bank is required to adopt NZ IFRS 16 Leases from 1 January 2019. The Bank has assessed the estimated impact that initial application of NZ IFRS 16 will have on its financial statements, as described below.

Leases in which the Bank is a lessee

The Bank will recognise new assets and liabilities for its operating leases of offies and cars (see Note 16.1). The nature of expenses related to those leases will now change because the Bank will recognise a depreciation charge for right-of-use assets and interest expense on lease liabilities.

Previously, the Bank recognised operating lease expense on a straight-line basis over the term of the lease, and recognised assets and liabilities only to the extent that there was a timing difference between actual lease payments and the expense recognised.

Based on the information currently available, the Bank estimates that it will recognise right-of-use assets and lease liabilities of \$20,597 thousand as at 1 January 2019. There will be no impact of opening retained earning and on prior period figures upon implementation of the standard.

The Bank intends to apply the simplified transition approach and will not restate comparative amounts for the year prior to first adoption.

Leases in which the Bank is a lessor

No significant impact is expected for leases in which the Bank is a lessor.

All cash and cash equivalents balances are highly liquid and recoverable on demand.

14 Derivative financial instruments

Derivative contracts include forwards, swaps and options; all of which are bilateral contracts or payment exchange agreements, whose fair values are derived from the notional value of an underlying asset, reference rate or index. The derivative instruments are classified as financial assets when their fair value is positive and as financial liabilities when their fair value is negative. The fair value is volatile to fluctuations in market interest rates or foreign exchange rates relative to their terms. The Bank uses derivatives as an end-user as part of its asset and liability management activities.

		2018			2017

Leasing arrangements

The Bank provides equipment and motor vehicle finance under hire purchase and leasing contracts to a broad range of food and agricultural industries. Contract terms are generally up to 5 years with either regular monthly payments or structured payments to match the customers' seasonal income patterns. The Bank only undertakes contracts where the underlying equipment or vehicle is used for a business purpose.

* Retail exposures include lending to rural clients together with all other lending to small and medium businesses.

** The impairment loss on an impaired asset is calculated as the difference between the asset's carrying amount and the estimated future cash flows discounted to its present value using the original effective interest rate for the asset. The discount unwinds over the period the asset is held as interest income.

24 Subordinated debt

in thousands of NZD	2018	2017
Due to wholly owned group	-	60,000
Accrued interest payable - wholly owned group*	-	859
Total subordinated debt	-	60,859

The Bank issued to Rabobank (New Zealand Branch) perpetual subordinated debt with a principal amount of NZ\$300,000,000 and a base rate (i.e. BKBM FRA rate) plus a margin of 2.25 per cent per annum. During 2017, subordinated debt of \$240,000,000 was redeemed, leaving outstanding principal of \$60,000,000. During 2018, subordinated debt of \$60,000,000 was redeemed, leaving no outstanding balance. Interest was payable semi-annually on the last days of February and August respectively. The subordinated debt had been issued on 13 August 2010 and is subordinated in rights of payment in the event of liquidation or wind up to the claims of depositors and all creditors of the Bank. The debt is repayable on any date at the option of the Bank, subject to a Bank directors' resolution that repayment is in the best interest of the Bank, and the Bank giving at least 10 business days' irrevocable notice to the holder. Under the RBNZ capital adequacy requirements, the perpetual subordinated debt progressively cease to be eligible Tier 2 capital for capital adequacy purposes as set out in table below. As at 31 December 2018 the subordinated debt balance is fully repaid (31 December 2017; \$60 million).

	Percentage of instruments that may

Opening balance	3,032	2,792
Additions	518	442
Used	(182)	(182)
Releases	(60)	(20)
Closing balance	3,308	3,032

27 Equity

in thousands of NZD	2018	2017
Contributed equity (note 27.1)	551,200	551,200
Reserves (note 27.2)	1,806	1,722
Retained earnings (note 27.3)	1,025,644	922,695
Total equity	1,578,650	1,475,617

27.1 Contributed equity

Changes in contributed equity, reserves and retained earnings were as follows:

in thousands of NZD	2018	2017
Opening balance	551,200	551,200
Ordinary share capital issued during the year	-	-
Closing balance	551,200	551,200

Prior to February 1998, the Bank issued 20,600,000 ordinary shares at a value of \$2 per share. On 11 August 2010, the Bank issued 150,000,000 ordinary shares at a value of \$2 per share. On 19 September 2012, the Bank issued 55,000,000 ordinary shares at a value of \$2 per share. On 20 September 2013, the Bank issued 50,000,000 ordinary shares at a value of \$2 per share.

As at 31 December 2018, total authorised and paid up capital comprised 275,600,000 ordinary shares fully paid ranking equally as to dividends, voting rights and rights to share in any surplus on winding up (31 December 2017: 275,600,000). Each share was issued at \$2 and has no par value. The ordinary share capital qualifies as Common Equity Tier 1 capital for capital adequacy purposes.

27.2 Reserves

in thousands of NZD	2018	2017
Opening balance	1,722	803
Changes in FVOCI financial assets revaluation reserve (gross)	117	1,276
Changes in FVOCI financial assets revaluation reserve (deferred tax)	(33)	(357)
Closing balance	1,806	1,722

The nature and purpose of the FVOCI financial assets revaluation reserve (AFS financial assets reserve under NZ IAS 39) is to record the unrealised gains or losses arising from changes in the fair value of FVOCI financial assets. The FVOCI financial assets revaluation reserve qualifies as Common Equity Tier 1 capital for capital adequacy purposes.

27.3 Retained earnings

in thousands of NZD	2018	2017
Opening balance	922,695	814,583
Impact of adoption of NZ IFRS 9	(140)	-
Net profit for the year	103,089	108,112
Closing balance	1,025,644	922,695

28 Contingent liabilities

Through the normal course of business, the Bank may be involved in litigation claims. The aggregate potential liability arising in respect of these claims cannot be accurately assessed. Provisions have been made where appropriate for likely loss of actual and potential claims after review has been made on a case by case basis. The Bank does not consider that the outcome of any claims made either individually or in aggregate are likely to have a material effect on its operation or financial position.

The Bank is party to financial instruments with off-balance sheet credit risk in the normal course of business to meet the financing needs of its customers and in managing its own risk profile. These financial instruments include commitments to extend credit, facilities, financial guarantees, and standby letters of credit. The Bank's exposure to credit loss in the event of non-performance by the other party to such financial instruments is represented by the contract or notional amount of those instruments. However, some commitments to extend credit and provide underwriting facilities can be cancelled or revoked at any time at the Bank's option. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

The following table shows the maximum amount payable for the following contingent liabilities.

Guarantees Lending commitments Irrevocable lending commitments Revocable lending commitments	1,483,727	1,426,151
Guarantees Lending commitments	1,403,648	1,336,328
Guarantees	74,240	84,494
	5,839	5,329
in thousands of NZD	2018	2017

Guarantees represent conditional undertakings by the Bank to support the financial obligations of its customers to third parties. Lending commitments include the Bank's obligations to provide funding facilities which remain undrawn at balance date, or where letters of offer have been issued but not yet accepted.

29 Expenditure commitments

29.1 Capital expenditure commitments

Estimated capital expenditure contracted for at balance date, but not provided for, or payable:

in thousands of NZD	2018	2017
One year or less	-	
Total capital expenditure commitments	-	-

29.2 Operating lease commitments

in thousands of NZD	2018	2017
One year or less	4,196	4,151
Between one and two years	2,921	2,934
Between two and five years	3,239	3,967
Over five years	-	735
Total operating lease commitments	10,356	11,787

Lease arrangements entered into by the Bank are for the purpose of accommodating the Bank's needs. These include operating lease arrangements over premises and motor vehicles used by staff in conducting business and office equipment such as photocopiers and printers.

Leases may be over commercial and residential premises and reflect the needs of the occupying business and market conditions. All leases are negotiated with external professional property advisors acting for the Bank. Rental payments are determined in terms of the relevant lease requirements, usually reflecting market rentals as described by standard valuation practice. The Bank as lessee has no purchase options over premises occupied. There are no restrictions imposed on the Bank's lease of space other than those forming part of the negotiated lease arrangements for each specific premises.

30 Priority of financial liabilities in the event of a liquidation

The financial liabilities of the Bank reported in these financial statements are unsecured. Where the assets of the Bank are liquidated or the Bank ceases to trade, those financial liabilities would rank (under New Zealand law in relation to those assets) equally with the claims of the Bank's other unsecured creditors and behind the preferred creditors set out in Schedule 7 of the Companies Act 1993.

31 Risks arising from financial instruments

Rabobank New Zealand Limited has an integrated framework of responsibilities and functions driven from the Board level down to operational levels, covering all material risks most notably credit, market, liquidity and operational risk. The Rabobank New Zealand Limited Board are ultimately responsible for the organisational strategy and business plan and ultimately responsible for the risk management framework and is responsible for the oversight of its operation by management.

The Board, through the RANZ Board, Risk & Compliance Committee (BRCC), oversees the establishment, implementation, review and monitoring of the Risk Management Strategy. It is also responsible for overseeing the effective and consistent application of the Risk Management Framework across Rabobank New Zealand Limited. This includes setting and monitoring risk appetite, approving risk limits and risk policies (within the overall limits set by Rabobank Group).

31.1 Liquidity risk

Liquidity risk is defined as the risk that the Bank will not have sufficient funds available to meet its financial and transactional cash flow obligations and regulatory obligations. The Bank's liquidity policies are designed to ensure that it has sufficient funds available, even in adverse circumstances, to meet its obligations, including loans and advances to customers, maturities of deposits and other obligations. Liquidity policies are reviewed periodically or at least annually. Rabobank's commitment to maintain appropriate level of retail deposit clients and liquid assets have supported the liquidity position during this period.

The main activities that give rise to liquidity risk are the Bank's typical banking activities of raising and repaying funding, lending and repaying of loans, and cashflows generated from derivatives. One fundamental role for a bank is to manage the maturity mismatch between assets and liabilities and liquidity risk arises when there is a mismatch in volume and timing of cashflows.

31 Risks arising from financial instruments (continued)

31.1 Liquidity risk (continued)

For the Bank, both long term and short term liquidity frameworks are in place:

- The long term framework measures the mismatch of core assets and liabilities with maturities greater than one year. The mismatch is measured monthly. A shortfall of long term liabilities above a defined acceptable limit triggers a request for long term funds.
- The short term framework focuses upon the net cash outflow on a 1 day, 7 day and 30 day horizon. The framework considers contractual and expected maturity on all asset and liability payments.

Liquidity risk is disclosed based on both contractual maturity and expected maturity.

- Contractual maturity is based on the undiscounted cash flows (principal and interest) based on the actual period of the contract. The tables in contractual maturity summarise the maturity profile of the Bank's financial assets and financial liabilities and contingent liabilities based on the contractual undiscounted cash flows.
- Expected maturity is based on an internally approved models and reflects how the Bank manages liquidity risk. The overriding principle is to match fund assets to the expected maturity of the liquidity commitment. Key assumptions regarding the expected maturity dates in the long term framework are applied to both the Rural asset portfolio and retail deposit liabilities.
- In the short term framework, the expected maturity of corporate and rural loans and assets held for collateral are always assumed to be rolled over, reflecting a conservative position whereby the Bank commits to refinancing its core client base. The tables in expected maturity summarise the maturity analysis of financial assets and financial liabilities according to when they are expected to be recovered or settled.

The Bank actively monitors and manages the mismatch between assets and liabilities as part of standard banking operations. The management of the mismatch of assets against liabilities using expected cash flows allows for the repayment behaviour of assets and liabilities that are not aligned to the contractual maturity. The Bank has access to diverse sources of short term funding programs that are supported in the market by its strong credit rating. These funding programs support the renewal of maturing liabilities.

Liquidity Portfolio

The Bank holds a portfolio of high quality liquid securities to support liquidity risk management. The size of the Bank's liquidity portfolio is based on the amount required to meet its liquidity risk appetite and regulatory obligations.

Maturity analysis of contingent liabilities (guarantees and commitments) by expected maturity is not disclosed as it is not expected to be different from contractual maturity in managing liquidity risk under the long term liquidity risk framework.

31 Risks arising from financial instruments (continued)

31.2 Market Risk

Market risk is defined as the risk that the fair value or future cash flows of a financial instrument that may fluctuate because of changes in market prices. The Bank's main types of market risk relate to interest rate and currency risks from non trading activities that arise from the banking book. The Bank's market risk is governed by the policies and procedures agreed by the Board. The policies serve a two-fold purpose: to protect the capital and earnings of the Bank, and to allow risk managers to benefit from movements in market risk without unduly compromising the Bank's capital or the stability of its' earnings. The market risk policy and procedures are continually updated in line with business developments. No material changes were made to the objectives, policies or processes impacting the Bank from the prior year.

Normal day-to-day banking activities can give rise to either of the aforementioned market risks. Currency risk arises from activities such as executing derivative products denominated in a foreign currency and holding balances in a foreign currency. Interest rate risk arises from activities such as borrowing and lending to customers, obtain funding from the retail market and from borrowing and lending with related parties. Market risks for the Bank result from the maturity mismatch of asset and liabilities giving rise to interest rate and FX risks. Market Risk capture and report the residual interest rate risks. Since client activity is almost entirely in local currency, and funding is broadly sourced from local markets, there is only residual exposure to foreign exchange risk for the Bank. The Bank has no exposure to market risk for equities and commodities.

The Bank uses Value-at-Risk (VaR) as one of the measures of market risk. VaR is a statistical measure of potential loss using historically observed market movements. The VaR uses a 1 year historical simulation to compute the 97.5% confidence interval for loss on a 1 day holding period basis. The VaR model is designed to measure market risk in normal market conditions. Although a valuable guide to market risk, VaR has its limitations. For example:

- the use of historical data as a proxy for estimating future events may not encompass all potential events, particularly those which are extreme in nature;
- the use of a 1-day holding period assumes that all positions can be liquidated or hedged in one day. This may not fully reflect the market risk arising at times of severe illiquidity, when a 1-day holding period may be insufficient to liquidate or hedge all positions fully;
- the use of 97.5% confidence level, by definition, does not take into account losses that might occur beyond this level of confidence; and
- VaR is calculated on the basis of exposures outstanding at the close of business and therefore does not necessarily reflect intra-day exposures.

The Risk Management Committee have approved a VaR limit of \$2 million which applied throughout the year (Dec17: \$2 million).

in thousands of NZD	2018	2017
VaR at year end	216	241

Market Risk also uses other tools which include positions, interest rate sensitivities and stress scenarios prepared daily and are used in managing and measuring market risks and interest rate risk on the banking book for the Bank. The production of all sensitivities is performed within trade capture systems. At the end of each day, independent market data is captured and used to discount all expected and replicated cash flows. The interest rate sensitivity, which is linear, is a measurement of gains or losses sensitivity of underlying positions to a 1 basis point upward shift in interest rate across the positions in the interest rate curve.

31 Risks arising from financial instruments (continued)

31.3 Credit Risk

- --

Credit risk arises from the potential inability of a debtor or counterparty to meet their contractual obligations.

The main activities that give rise to credit risk are the Bank lending money and otherwise entering into transactions involving customers of the Bank, or others owing money to the Bank.

The Bank's credit risk policies focus, amongst other things, on facility terms, serviceability and relevant security. The Bank grants facilities only if it expects that a client will fully meet its payment commitment and the approval of facilities is undertaken by authorised personnel or an appropriate Credit Committee. Once a facility has been granted, the Bank monitors the extent to which the client meets its agreed obligations. In its approval process the Bank uses the Bank's Internal Risk Rating, which reflects the counterparty's probability of default. The credit risk processes, including compliance with policy, are subject to internal and external audit.

The Bank has a credit risk framework (including the credit policies) which is described in the Bank's Risk Management Strategy and is in line with the Board approved Risk Appetite Statement. The Bank uses Key Risk Indicators to measure and monitor credit and concentration risks. These are described in the Risk Appetite Statement. The Bank's lending portfolio is measured against the Key Risk Indicators on a quarterly basis to ensure the risk profile of the portfolio remains at an acceptable level and in accordance with the risk appetite. The key concentration risks that are monitored via the Key Risk Indicators are sector, exposure and geographical concentration.

Industry sectors are determined by reference to the Australian and New Zealand Standard Industrial Classification (ANZSIC) codes.

No significant changes were made to the objectives, policies or processes from the prior year.

31.3.1 Maximum exposure to credit risk without taking account of any collateral and other credit enhancements

The following tables show the maximum exposure to credit risk for the components of the balance sheet and off balance sheet, including derivatives and commitments and guarantees by industry and geography.

Credit exposures consist of :

31 Risks arising from financial instruments (continued)

31.3 Credit Risk (continued)

31.3.2 Collateral and other credit enhancements

The main types of collate	eral obtained are as follows:
Asset class	Collateral type
Cash and cash equivalents	These exposures are mainly to relatively low risk banks (rated A+, AA- or better). These balances are not collateralised.
Derivative financial instruments	Exposures of food and agribusiness banking clients under derivative transactions are generally fully secured or partially secured by the same security that secures the loan of these clients. Security is typically taken under general security agreements and specific security arangements over agricultural or commercial properties (i.e. the farm), business assets, inventories or other assets. Other forms of credit protection may also be sought or taken out if warranted. The security is usually linked to derivative close-out netting arrangements which govern such transactions. Exposures to related parties under derivative transactions are generally considered to be low risk due to the nature of the counterparties, and there are typically no collateral or other credit enhancements obtained.
Financial assets at fair value through other comprehensive income (2017: Available-for-sale securities)	These exposures are with the New Zealand government and other financial institutions (supranationals). Collateral is not sought directly with respect to these exposures.
Loans and advances	The food and agribusiness banking loans are fully secured or partially secured. These lending exposures will generally have a significant level of collateralisation depending on the nature of the product. Security is typically taken in the form of mortgages over water rights, rural and non-rural properties, commercial properties, and some residential properties; General Security Agreements over all present and after-acquired property; Specific Security Agreements over specific personal property; and Borrower group guarantees, as well as guarantees from some directors and principals. For some clients, security is taken in the form of General Security Agreements over all present and after-acquired property of the Borrower Group, specific real property mortgages and Borrower Group guarantees. As at 31 December 2018, average loan to valuation ratio is 45.9% (2017: 47.6%).
Due from related entities	These exposures are generally considered to be low risk due to the nature of the counterparties. There are typically no collateral or other credit enhancements obtained in respect of amounts due from related entities.
Other assets	Collateral is generally not sought on these balances except on accrued interest receivable which is assumed to follow the principal amount recorded in Loans.

It is the Bank policy to dispose of repossessed assets in an orderly fashion. The proceeds are used to reduce or repay the outstanding claim. The Bank does not use or take repossessed properties for business use. During the year ended 31 December 2018, the Bank did not assume ownership of any repossessed properties (31 December 2017: nil).

The Bank writes off loans when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery include (i) ceasing enforcement activity and (ii) where the recovery method is foreclosing on collateral and the value of the collateral is such that there is no reasonable expectation of recovering in full. The Bank may write-off loans that are still subject to enforcement activity. The outstanding contractual amounts of partly or wholly written off assets during 2018 was nil.

Risks arising from financial instruments (continued) 31

31.3.3 Credit quality per class of financial assets

The credit quality of financial assets is managed by the Bank using internal credit ratings. The table below shows the credit quality by class of asset for all financial assets exposed to credit risk, based on the Bank's internal credit rating system. The amounts presented are gross of impairment provisions.

are gross of impairment pro	ivisions.

31 Risks arising from financial instruments (continued)

31.3.3 Credit quality per class of financial assets (continued)

Credit rating descriptions

R0-R7	Counterparties that are strong to extremely strong in meeting current and future financial commitments of the Bank.
R8-R10	Counterparties that have adequate capacity to meet current and future financial commitments to the Bank.
R11-R14	Counterparties that have adequate capacity to meet current financial commitments of the Bank. Counterparties that currently have the capacity to meet financial commitments but are vulnerable to
D4.5. D00	Contrepances that currently have the capacity to meet maintai commitments but are vulnerable to

R15-R20adverse business, financial or economic conditions. The higher the rating the more sensitive the
counterparty is to adverse changes in business, financial or economic conditions.
Counterparties are in default classifications. D1 represents more than 90 days' past due on a material
contractual payment; D2 indicates that it is unlikely that the obligor will pay its debt in full, without recourse
by the bank to actions such as realizing security; D3 indicates that a distressed sale or a distressed
restructuring has occurred that likely results in a credit-related economic loss; and D4 indicates bankruptcy
status.

The default ratings are assigned following identification of default triggers and result in transfer of the loans to stage 3 for the purposes of calculation of impairment allowance. Following identification of the default triggers, the Bank assess whether the account is impaired. This is required to be completed for every account in the Bank when default triggers are identified and for every loan application / review. The default triggers provide an objective check of factual and financial matters that might be an indication of default, and eventual impairment. Refer to Note 18.1 for details of loans assessed as impaired. All of these are subject to Lifetime ECL allowance.

31.3.4 Modified assets

The risk of default of modified assets is assessed at the reporting date and compared with the risk under the original terms at initial recognition. Rabobank monitors the subsequent performance of these forborne modified assets and may determine that the credit risk has significantly improved, so that the assets are moved from stage 3 or stage 2 (Lifetime ECL) to stage 1 (12-month ECL). The gross carrying amount of such assets held as at 31 December 2018 was 10,103 thousand. Amortised cost before modification of financial assets with lifetime ECL whose cash flows were modified during the period was \$19,744 thousand.

31.3.5 Estimated fair value of collateral on impaired loans

in thousands of NZD	2018	2017
Fair value of collateral held**	249,174	286,670
Total impaired assets (note 18.1)	257,246	293,116

** Loans are cross collateralised against all facilities held by a customer, the estimated fair value of collateral represents the total aggregate collateral relating to the customer.

31.3.6 Concentration of credit exposures to individual counterparties

	2018	2017		
Bank counterparties:	December	quarter	December	Peak for the quarter
Percentage of Common equity Tier 1 capital				
10-15%	-	-	-	-
15-20%	-	-	-	-
Non-bank counterparties:				
Percentage of Common equity Tier 1 capital				
10-15%	-	-	-	-
15-20%	-	-	-	-
20-25%	-	-	-	-

All non-bank counterparties disclosed in the table above do not have a long-term credit rating.

Credit exposure is calculated on the basis of actual exposure net of individual credit impairment provision. It excludes credit exposures to Connected Persons, credit exposures to the central government or central bank of any country with a long-term credit rating of A- or A3 or above, or its equivalent, and credit exposures to any supranational or quasi-sovereign agency with a long-term credit rating of A- or A3 or above, or its equivalent.

The peak end-of-day credit exposure is measured by taking the maximum end-of-day aggregate credit exposure during the period and dividing it by the Banking Group's Common equity Tier 1 capital as at the end of the period.

31.3.7 Concentration of credit exposure with related counterparties

Number of groups of closely related counterparties

-	-
-	-
-	-
-	-
	-

2010 2017

For the purpose of this disclosure, the Bank measures connected party exposures on a net-exposure basis, as described in the RBNZ's Connected Exposures Policy (BS8). Aggregate gross exposures to connected persons must not exceed 125% of the Bank's Tier One capital or net exposures a percentage based on an external rating (S&P A = 40%) of the Bank's Tier One capital ratio. As described in "Capital Adequacy Framework (Standardised Approach)" (BS2A), the exposure value for bilateral on-balance sheet netting of loans and deposits is calculated by treating loans as exposures and deposits as cash collateral. Information on loss allowance is included in note 36.

33 Fair value of financial instruments

Financial assets and financial liabilities are measured on an ongoing basis either at fair value or amortised cost, in accordance with accounting policies described in note 3.4 NZ IFRS 13 'Fair Value Measurement' requires the Bank to disclose the fair value of those financial instruments not already carried at fair value in the Balance Sheet.

The estimated fair value of the financial assets and financial liabilities are:

	201	8	2017		
	Carrying	Fair	Carrying	Fair	
in thousands of NZD	amount	value	amount	value

Fair value hierarchy

The Bank categorises its fair value measurements on the basis of inputs used in measuring fair value using the fair value hierarchy below:

Level 1: Financial instruments that have been valued by reference to unadjusted quoted prices in active markets for identical financial instruments. This category includes financial instruments valued using quoted yields where available for specific debt securities.

Level 2: Financial instruments that have been valued through valuation techniques incorporating inputs other than quoted prices within Level 1 that are observable for a similar financial asset or liability, either directly or indirectly. Level 3: Financial instruments that have been valued using valuation techniques which incorporate significant inputs that are not based on observable market data (unobservable inputs).

Valuation methodology

Financial assets and financial liabilities carried at fair value

For financial assets and financial liabilities carried at fair value, fair value has been derived as follows:

Derivative financial instruments and FVOCI financial assets

Fair values are based on quoted market prices. Where a quoted price is not available, fair values are estimated using quoted market prices for securities with similar credit, maturity and yield characteristics, or market accepted valuation models as appropriate (including discounted cash flow models) based on current market yields for similar types of instruments and the maturity of each instrument.

A Credit Valuation Adjustment (CVA) is applied to the Bank's over-the-counter derivative exposures to take into account the counterparty's risk of default when measuring the fair value of the derivative. The Bank uses a Bilateral Credit Valuation Adjustment (BCVA) methodology to calculate the expected future credit exposure for all derivative exposures including inputs regarding probabilities of default (PDs) and loss given default (LGD).

33 Fair value of financial instruments (continued)

Financial assets and financial liabilities carried at fair value (continued)

The following table categorise financial assets and financial liabilities that are recognised and measured at fair value according to the three levels of hierarchy.

in thousands of NZD	Level 1	Level 2	Level 3	Total
At 31 December 2018				
Financial assets				
Derivative financial instruments	-	4,416	-	4,416

Financial liabilities				
Financial liabilities Derivative financial instruments		3,922	_	3,922

Transfers into and transfers out of fair value hierarchy levels are reported using the end-of-period fair values.

Financial assets and financial liabilities carried at amortised cost

For financial assets and financial liabilities carried at amortised cost, an estimate of the fair value has been derived as follows, and are categorised as level 3 (with the exception of cash and cash equivalents which are level 1, and due from other financial institutions and deposits which are level 2).

Cash and cash equivalents

Fair value approximates carrying value due to their short term nature, frequent repricing or high credit rating.

Due from other financial institutions, Loans and advances and Due from related entities

The carrying value of due from other financial institutions, loans and advances and due from related entities is net of collective and specific provisions. Fair value of call and variable rate loans and advances approximate their carrying value as they are short term in nature or payable on demand. Fair value of term loans and advances are estimated using discounted cash flows, applying market rates offered for loans of similar remaining maturities.

Other financial assets and Other financial liabilities

For all other financial assets and financial liabilities fair value approximates carrying value due to their short term nature, frequent repricing or high credit rating.

Deposits and Due to related entities

Fair value of call and variable rate deposits approximate their carrying value as they are short term in nature or payable on demand.

Fair value of term deposits are estimated using discounted cash flows, applying market rates offered for deposits of similar remaining maturities.

Subordinated debt

Fair values are calculated using discounted cash flow models based on repricing dates, with discount rates at current interest rates for instruments with similar maturity.

34 Offsetting financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount reported in the balance sheet where the Rabobank New Zealand Limited currently has a legally enforceable right to offset the recognised amounts, and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

The following table presents the recognised financial instruments that are offset, or subject to enforceable master netting arrangements and other similar agreements but not offset, as at 31 December 2018 and 31 December 2017. The column 'net amount' shows the impact on the bank's balance sheet if all set-off rights were exercised.

36 Related party disclosures

The Bank's parent entity is Rabobank International Holding B.V. The ultimate controlling party is Rabobank. Both the parent entity and the ultimate controlling entity are incorporated in the Netherlands. Dealings include funding, deposits and derivatives. The amounts of principal and interest due from and to related entities are disclosed in the statement of financial position and notes to the financial statements.

36.1 Transactions with related parties

36.1.1 Guarantees

The first period

For the period 18 February 1998 to 17 February 2008 ("the First Period"), the obligations of the Bank were guaranteed pursuant to a deed of guarantee dated 18 February 1998 (as amended by an amending deed dated 19 February 1998) by Rabobank in favour of Permanent Trustee Company Limited (the "Trustee") as trustee for the creditors of the Bank (the "First Guarantee").

Whilst the First Guarantee expired on 17 February 2008, all obligations incurred by the Bank during the First Period will continue to be covered by the First Guarantee until those obligations are repaid.

The second period

For the period 18 February 2008 to 17 February 2010 ("the Second Period"), the obligations of the Bank were guaranteed pursuant to a deed of guarantee dated 6 February 2008 by Rabobank in favour of the creditors of the Bank (the "Second Guarantee").

Whilst the Second Guarantee expired on 17 February 2010, all obligations incurred by the Bank during the Second Period will continue to be covered by the Second Guarantee until those obligations are repaid.

The third period

For the period 18 February 2010 to 17 February 2012 ("the Third Period"), the obligations of the Bank were guaranteed pursuant to a deed of guarantee dated 1 September 2009 by Rabobank in favour of the creditors of the Bank (the "Third Guarantee").

Whilst Third Guarantee expired on 17 February 2012, all obligations incurred by the Bank during the Third Period will continue to be covered by the Third Guarantee until those obligations are repaid.

The fourth period

For the period 18 February 2012 to 17 February 2013 ("the Fourth Period"), the obligations of the Bank were guaranteed pursuant to a deed of guarantee dated 10 October 2011 by Rabobank in favour of the creditors of the Bank (the "Fourth Guarantee").

Whilst the Fourth Guarantee expired on 17 February 2013, all obligations incurred by the Bank during the Fourth Period will be covered by the Fourth Guarantee until those obligations are repaid.

The fifth period

For the period 18 February 2013 to 17 February 2014 ("the Fifth Period"), the obligations of the Bank are guaranteed pursuant to a deed of guarantee dated 9 July 2012 by Rabobank in favour of the creditors of the Bank (the "Fifth Guarantee").

Whilst the Fifth Guarantee expired on 17 February 2014 all obligations incurred by the Bank during the Fifth Period will be covered by the Fifth Guarantee until those obligations are repaid.

36 Related party disclosures (continued)

36.1 Transactions with related parties (continued)

36.1.1 Guarantees (continued)

The sixth period

For the period 18 February 2014 to 17 February 2015 ("the Sixth Period"), the obligations of the Bank are guaranteed pursuant to a deed of guarantee dated 20 August 2013 by Rabobank in favour of the creditors of the Bank (the "Sixth Guarantee").

Whilst the Sixth Guarantee expired on 17 February 2015 all obligations incurred by the Bank during the Sixth Period will be covered by the Sixth Guarantee until those obligations are repaid.

The seventh period

For the period 18 February 2015 to 30 April 2015 ("the Seventh Period"), the obligations of the Bank will be guaranteed pursuant to a deed of guarantee dated 19 September 2014 by Rabobank in favour of the creditors of the Bank (the "Seventh Guarantee").

Whilst the Seventh Guarantee expired on 30 April 2015, all obligations incurred by the Registered Bank up to the close of 30 April 2015 will continue to be covered by the Seventh Guarantee or one of the earlier guarantees described above (as applicable), until those obligations are repaid or otherwise satisfied.

Further information about the expiry of the guarantee can be found at www.rabodirect.co.nz.

36.1.2 Commission and fee expense

A fee of \$0.6 million was charged to the Bank by Rabobank in consideration for providing the obligations guarantees for 2018 (2017: \$0.8 million).

36.1.3 Management expenses

Management expenses and recharges relate to provision of administrative and management services and recharges of direct costs incurred by other related entities. Management expenses and recharges of \$37 million (2017: \$32 million) were charged to the Bank by the Australia Branch of Rabobank, similarly \$13 million (2017: \$11 million) were charged to the Bank by the Australia Branch of Rabobank, similarly \$13 million (2017: \$11 million) were charged to the Bank by the Australia Branch of Rabobank, similarly \$13 million (2017: \$11 million) were charged to the Bank by the Rabobank Head Office, and similarly \$1.8 million (2017: \$0.9 million) was charged by the Bank to New Zealand Branch of Rabobank.

36.1.4 Other transactions

The Bank enters into a number of transactions with other related entities of Rabobank, but mainly with the New Zealand Branch of Rabobank. These transactions include funding, loans deposits and accrued interest. Interest recorded and charged was on normal commercial terms throughout the year. The balances and transactions are summarised in table below:

in thousands of NZD	2018	For the year	2017	For the year
Due from related entities	428,422	8,048	365,904	11,009
Due to related entities	6,105,915	184,565	5,732,753	184,174
Subordinated debt	-	454	60,859	4,127

Derivatives with a combined notional of \$150.2 million and a net fair value liability position of (\$4.5 million) (2017: \$106.05 million and (\$3.4 million) respectively) are held with the New Zealand Branch of Rabobank and with Rabobank.

36.1.5 Working capital facilities

A loan facility of EUR 4.6 billion was granted from the New Zealand Branch of Rabobank to the Bank on 21 December 2016. The unused amount at 31 December 2018 was EUR 1.18 billion (2017: EUR 1.2 billion).

36 Related party disclosures (continued)

36.2 Terms and conditions of transactions with related parties

All transactions with related parties are made in the ordinary course of business on normal commercial terms and conditions.

Outstanding balances at year end are unsecured and settlement occurs in cash.

36.3 Provision for impairment

For the year ended 31 December 2018, the Bank has not made any provision for impairment relating to amounts owed by related parties as the payment history has been excellent (2017: nil). An impairment assessment is undertaken each financial year by examining the financial position of the related party and the market in which the related party operates to determine whether there is objective evidence that a related party receivable is impaired. When such objective evidence exists, the Bank recognises a provision for impairment. The implementation of NZ IFRS 9 resulted in recognition of the impairment allowance relating to amounts owned by related parties of \$0.2 million as a result of the new expected credit loss impairment model. (Refer to note 2.6 for key impacts of the implementation of NZ IFRS 9 and note 18.5 for period end balances).

37 Key management personnel

37.1 Compensation of key management personnel (KMP)

The information disclosed below includes benefits paid to New Zealand KMPs together with any benefits paid to directors for the services provided to Rabobank New Zealand Limited and other entities within RANZ. The population of New Zealand KMPs has been reassessed during the year. KMP includes roles that do not have direct responsibility for RNZL. There were 20 KMP's in 2018 (2017: 17).

Total KMP compensation	5,735,856	6,678,107
Termination benefits	587,546	1,008,588
Other long term benefits	622,369	532,894
Post employment benefits	124,854	256,056
Short term employee benefits	4,401,087	4,880,569
in whole NZD	2018	2017

37.2 Transactions and balances with key management personnel and their related parties

The following table provides the total amount of loans to key management personnel. On average, the interest payable on the loan is approximately 0.8% (2017: 0.8%) below published market rate. Outstanding loan balances at 31 December 2018 are secured. No provision for impairment is recognised as at 31 December 2018 as the payment history has been excellent (2017: nil).

in whole NZD	2018	2017
Loans outstanding at the beginning of the year	4,953,760	3,780,082
Net loan movements during the year	(914,913)	1,173,678
Loans outstanding at the end of the year	4,038,847	4,953,760
Interest income during the year	207,357	184,859

Prior period balances have been restated to reflect loans provided by the Bank and incorporate additional transactions.

in whole NZD	2018	2017
Deposits outstanding at the beginning of the year	49,000	59,704
Net deposit movements during the year	30,349	(10,704)
Deposits outstanding at the end of the year	79,349	49,000
Interest expense during the year	1,111	844

38 Subsequent events

The directors are not aware of any event or circumstances since the end of the year not otherwise dealt with in this report that has or may significantly affect the operations of the Bank, the results of those operations or the state of affairs of the Bank in subsequent financial years.

39 Dividend

No dividend was proposed or paid by the Bank for 2018 (2017: nil).

40 Capital management

The primary objectives of the Bank's capital management are to ensure that the Bank complies with externally imposed capital requirements and that the Bank maintains strong credit ratings and healthy capital ratios in order to support its business.

The adequacy of the Bank's capital is monitored using, among other measures, the rules and ratios established by the Basel Committee on Banking Supervision ("BIS rules/ratios") and adopted by the Reserve Bank of New Zealand (RBNZ) in supervising the Bank.

The Bank's conditions of registration require capital adequacy ratios to be calculated in accordance with the BS2A (Capital Adequacy Framework). For regulatory capital adequacy purposes, total regulatory capital is defined as the sum of Common Equity Tier One capital, Additional Tier One capital and Tier Two capital. Tier One capital is defined as the sum of Common Equity Tier One capital and Additional Tier One capital.

Common Equity Tier 1 or core capital includes paid up ordinary shares, retained earnings, FVOCI financial assets revaluation reserve less certain deductions. The Bank does not have any additional Tier One capital. Tier Two capital includes subordinated debt.

The Bank documents its Internal Capital Adequacy Assessment Process (ICAAP) as required by the RBNZ. The ICAAP document sets out the framework used by the Bank to determine the minimum levels of capital it requires given the nature of its business, and how the various risks is exposed to will be managed.

The Bank maintained a strong capital position with its capital ratio well in excess of the regulatory minimum capital adequacy requirements and the Board approved capital target level at all times throughout the year ended 2018. The Bank has complied in full with all of its imposed capital requirements during the 2018 and 2017 financial years.

40.1 Capital

in thousands of NZD	2018	2017

Directors' Declaration

The directors of Rabobank New Zealand Limited ("the Bank") submit the annual report of the Bank for the year ended 31 December 2018.

The Shareholders of the Bank have agreed to apply the reporting concessions available under section 211(3) of the Companies Act 1993. Accordingly, there is no information required to be included in the Annual Report other than the financial statements for the year ended 31 December 2018, which are enclosed.

The directors of Rabobank New Zealand Limited declare that in their opinion:

(a) the financial report and notes of the Bank comply with the applicable accounting standards, are in accordance with the requirements of the Financial Markets Conduct Act 2013, and the Companies Act 1993 and give a true and fair view of the Bank's financial position as at 31 December 2018 and its performance for the year ended 31 December 2018; and

(b) there are reasonable grounds to believe that the Bank will be able to pay its debts as and when they become due and payable;

Signed in accordance with a resolution of the directors.

Sir Henricus (Henry) Wilhelmus van der Heyden Chairman

Date: 26 March 2019

Anne Brennan Director Date: 26 March 2019

Independent auditor's report

To the shareholder of Rabobank New Zealand Limited

The financial statements comprise:

- the statement of financial position as at 31 December 2018;
- the statement of comprehensive income for the year then ended;
- the statement of changes in equity for the year then ended;
- the statement of cash flows for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Our opinion

In our opinion, the financial statements of Rabobank New Zealand Limited (the Bank), present fairly, in all material respects, the financial position of the Bank as at 31 December 2018, its financial performance and its cash flows for the year then ended in accordance with New Zealand Equivalents to International Financial Reporting Standards (NZ IFRS) and International Financial Reporting Standards (IFRS).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (New Zealand) (ISAs NZ) and International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Bank in accordance with Professional and Ethical Standard 1 (Revised) *Code of Ethics for Assurance Practitioners* (PES 1) issued by the New Zealand Auditing and Assurance Standards Board and the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants* (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

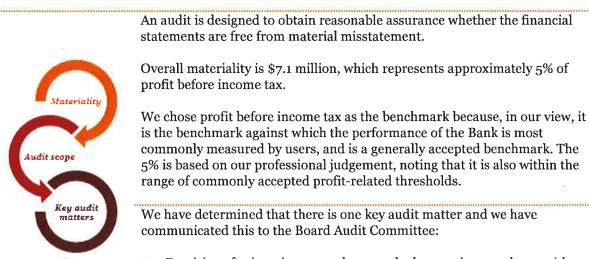

Other than in our capacity as auditor we have no relationship with, or interests in, the Bank. Partners and employees of our firm may deal with the Bank on normal terms within the ordinary course of trading activities of the business of the Bank. These matters have not impaired our independence as auditor of the Bank.

Our audit approach

Overview

• Provisions for impairment on loans and advances in accordance with the new accounting standard NZ IFRS 9 Financial Instruments.

Materiality

The scope of our audit was influenced by our application of materiality.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall materiality for the financial statements as a whole as set out above. These, together with qualitative considerations, helped us to determine the scope of our audit, the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Audit scope

We designed our audit by assessing the risks of material misstatement in the financial statements and our application of materiality. As in all of our audits, we also addressed the risk of management override of internal controls including among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the financial statements as a whole, taking into account the structure of the Bank, the accounting processes and controls, and the industry in which the Bank operates.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current year. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Further, any commentary on the outcomes of a particular audit procedure is made in that context.

Key audit matter

Provisions for impairment on loans and advances in accordance with the new accounting standard NZ IFRS 9 Financial Instruments (Refer to Notes 10 and 18 of the financial statements).

Provisions for impairment on loans and advances were a key audit matter because of the subjective and complex judgements made by the Bank in determining the necessity for, and then estimating the size of, provisions for impairment on loans and advances.

In addition, the Bank adopted the new accounting standard NZ IFRS 9 Financial Instruments which introduces an expected credit loss ("ECL") model which takes into account forward looking information reflecting the Bank's view on potential future economic events. This requires considerable judgement to estimate ECL provision against financial instruments.

Key elements in the provisioning for impairment on loans and advances under NZ IFRS 9 include:

- The judgement applied in determining exposures that have a significant increase in credit risk including the allocation of all financial assets subject to impairment into 3 separate stages depending on their nature and characteristics
- The application and judgements in setting the assumptions used in the ECL models, such as estimating forward looking probability of default (PD), loss given default (LGD) of financial instruments and macroeconomic scenarios and their weightings

How our audit addressed the key audit matter

We assessed the design and tested the operating effectiveness of relevant key controls over the provisioning for impairment on loans and advances under NZ IFRS 9.

The relevant key controls included:

- Governance over the development, validation and approval of the Bank's ECL models to assess compliance with NZ IFRS 9.
- Review and approval of key judgements, assumptions and forward looking information used in the ECL models.
- Interfaces and reconciliations of transfer of data inputs from source systems to the models.
- The review and approval process for the outputs of the ECL model and the adjustments and economic overlays that are applied to the modelled outputs, and disclosure of the NZ IFRS adoption.

Our procedures over the provisions for impairment on loans and advances included:

Collective Provision (Stage 1, 2, 3a)

- Consideration of the methodology inherent within the models against the requirement of NZ IFRS 9.
- Assessment of key assumptions in the ECL models, including staging, PD and LGD. This included using credit modelling specialists in our assessment.
- Assessment of the economic information used within, and weightings applied to, forward looking scenarios.
- Testing the accuracy and completeness of the key data inputs used in the ECL models by comparing it to the relevant supporting documents.

Key audit matter

• Overlays added to reflect the emerging trends or particular situations which are not otherwise captured by the impairment models.

How our audit addressed the key audit matter

- Recalculation of the ECL for a sample using the key assumptions in the models, such as PD and LGD.
- Consideration of the potential for the ECL provisions to be affected by events not captured by the Bank's ECL models, and assessing whether the overlays were appropriate in accordance with the New Zealand Accounting Standards.
- We assessed the appropriateness of the Bank's transition disclosure in the financial statements in light of the requirements of New Zealand Accounting Standards.

Specific Provision (stage 3b)

- For a sample of individually assessed loans and advances, we examined the forward looking scenarios used and the weightings applied, including the Bank's cash flow forecasts supporting the impairment calculation in light of the requirement of NZ IFRS 9.
- We assessed the key judgements (in particular the amount and timing of recoveries) made by the Bank in the context of the borrowers' circumstances based on the detailed loan and counterparty information known by the Bank.
- We compared the valuation of collateral held to external information where available.
- We assessed the appropriateness of the Bank's transition disclosure in the financial statements in light of the requirements of New Zealand Accounting Standards.

Information other than the financial statements and auditor's report

The Directors of Rabobank New Zealand Limited (the Directors) are responsible for the annual report. Our opinion on the financial statements does not cover the other information included in the annual report and we do not, express any form of assurance conclusion on the other information.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially

misstated. If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the financial statements

The Directors are responsible, on behalf of the Bank, for the preparation and fair presentation of the financial statements in accordance with NZ IFRS and IFRS, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Bank or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements, as a whole, are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs NZ and ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located at the External Reporting Board's website at:

https://www.xrb.govt.nz/standards-for-assurance-practitioners/auditors-responsibilities/audit-report-2/

This description forms part of our auditor's report.

Who we report to

This report is made solely to the Bank's shareholder. Our audit work has been undertaken so that we might state those matters which we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Bank and the Bank's shareholder, for our audit work, for this report or for the opinions we have formed.

The engagement partner on the audit resulting in this independent auditor's report is Ashley Wood.
